Chapter 1

INVESTIGATORS!

MANGO and **BRASH**, this is the General Inspector! I have an urgent mission for you! A rocket is about to launch from a secret base beneath the opera house!

Your job is to go undercover as orchestra musicians—

Way ahead of you, boss!

*Special Undercover Investigation Teams

On the rocket, to be more accurate. I left my trombone case backstage.

Ah, wonderful! That's why you're our **TOP AGENTS!**

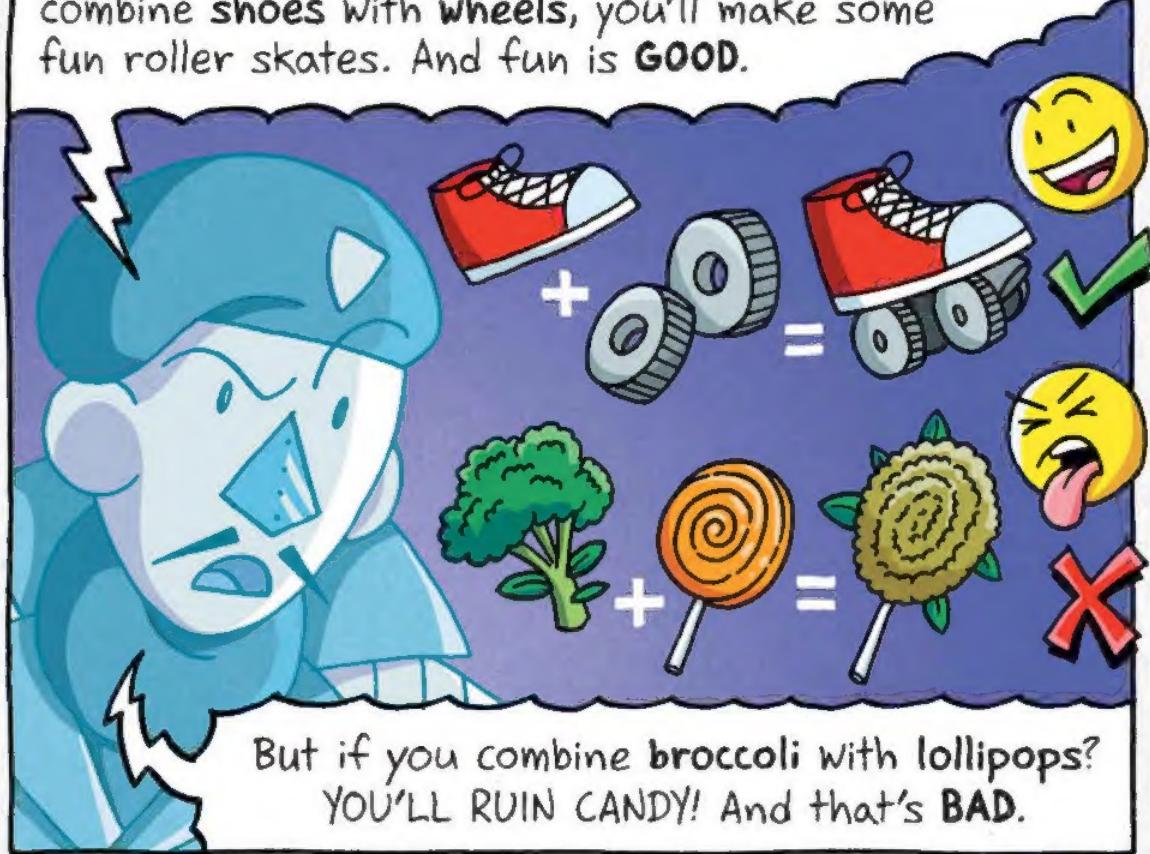

That rocket carries stolen code that could turn any machine into a **COMBINOTRON**—a device that can stick any two things together!

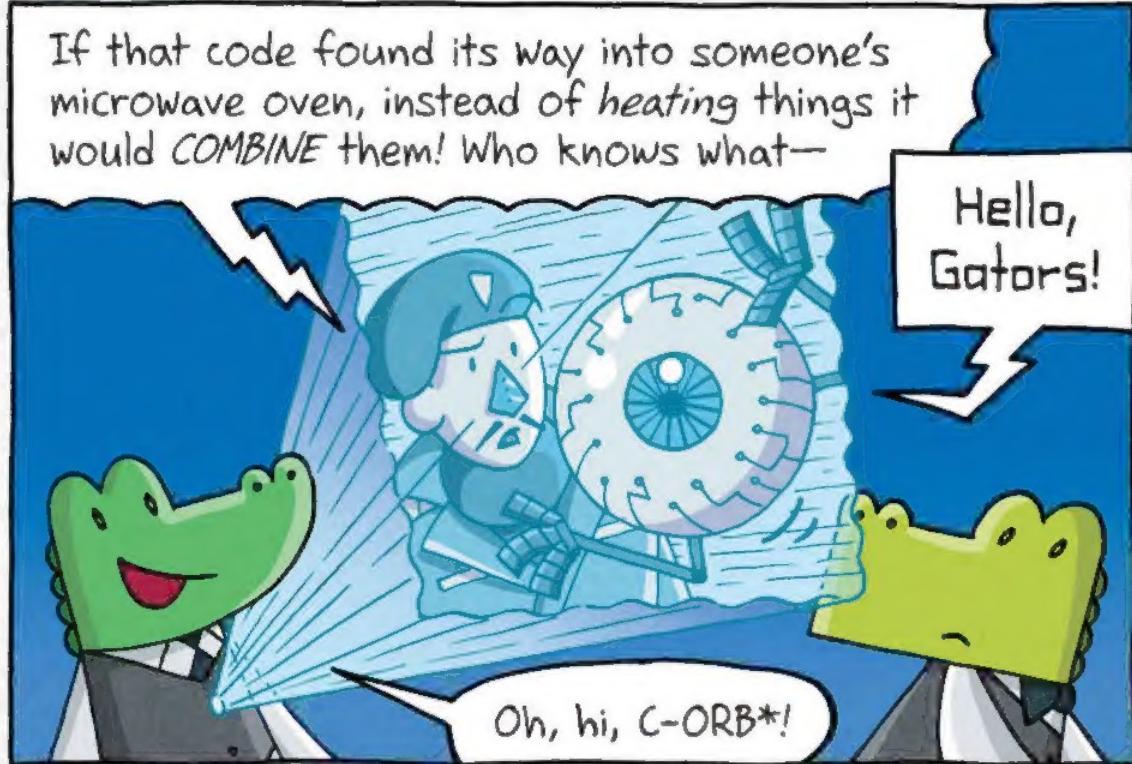

You mean like duct tape?

Worse than duct tape! Or better, depending on how you look at it... Like most technology, a **combinotron** could be used for good or evil! For example: If you combine **shoes** with **wheels**, you'll make some fun roller skates. And fun is **GOOD**.

If that code found its way into someone's microwave oven, instead of heating things it would **COMBINE** them! Who knows what—

*Computerized Ocular Remote Butler

Guess who has two thumbs
and is going on a mission
of their own? ME!

That's great, C-ORB!
Did you hear that,
Brash?

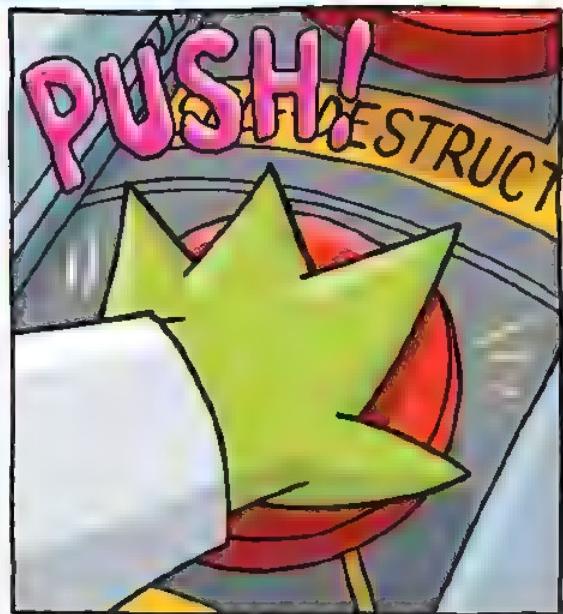

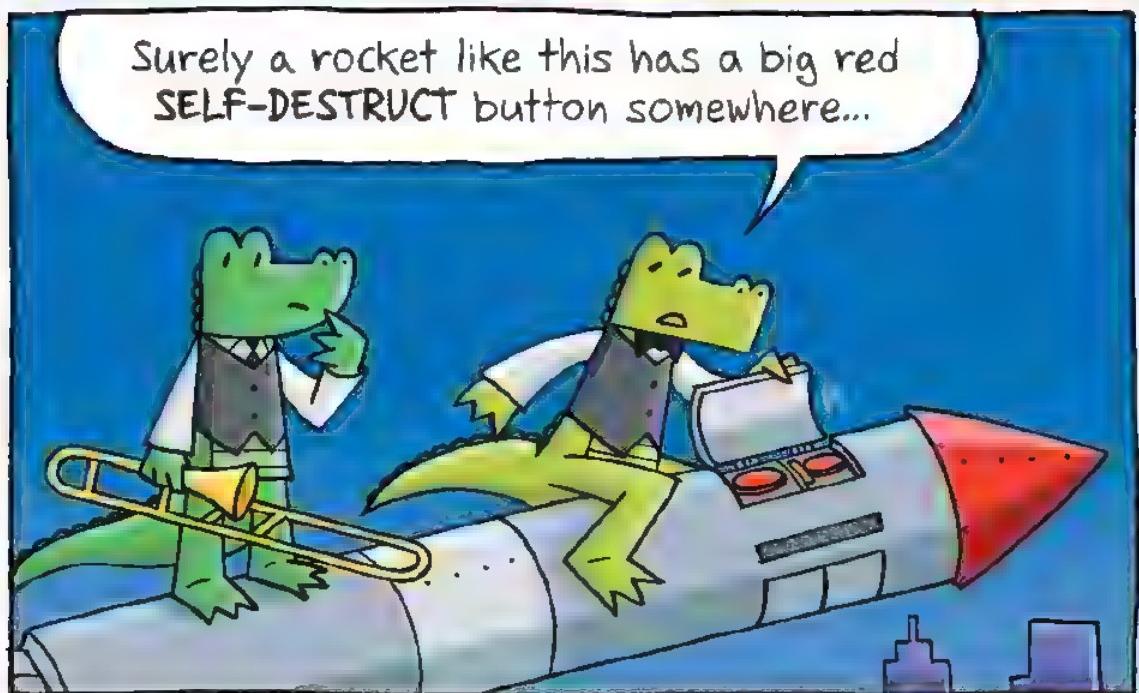

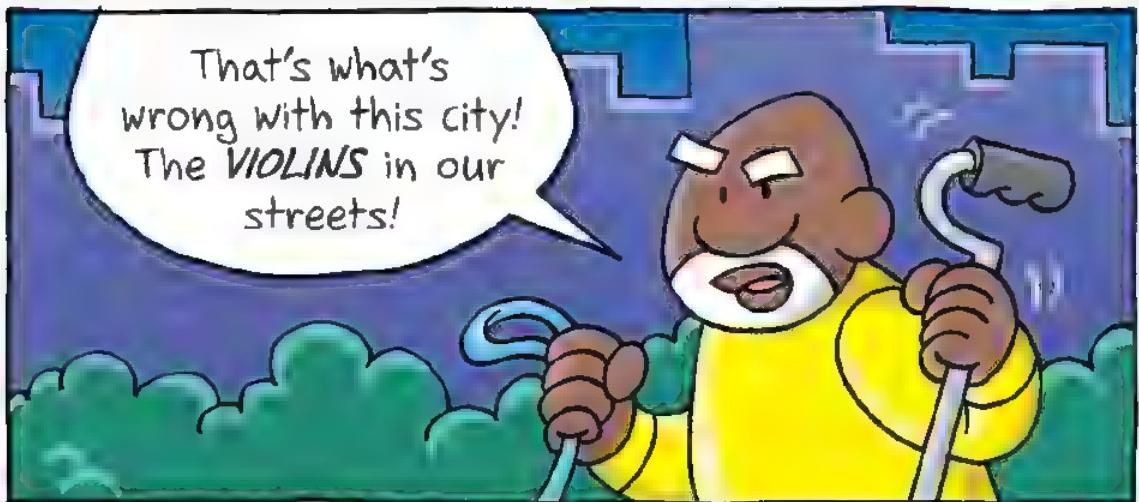

MANGO! We're on a ROCKET!
This is no time for idle chitchat!

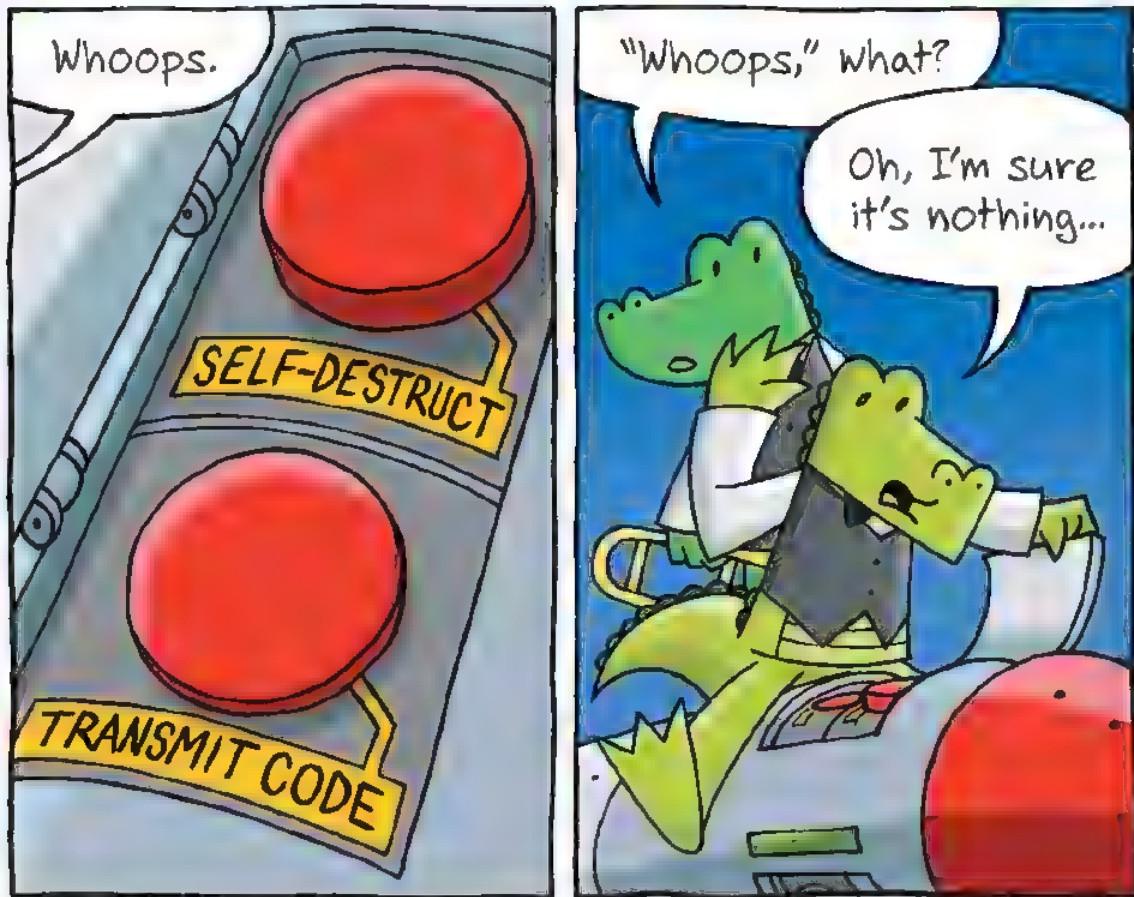

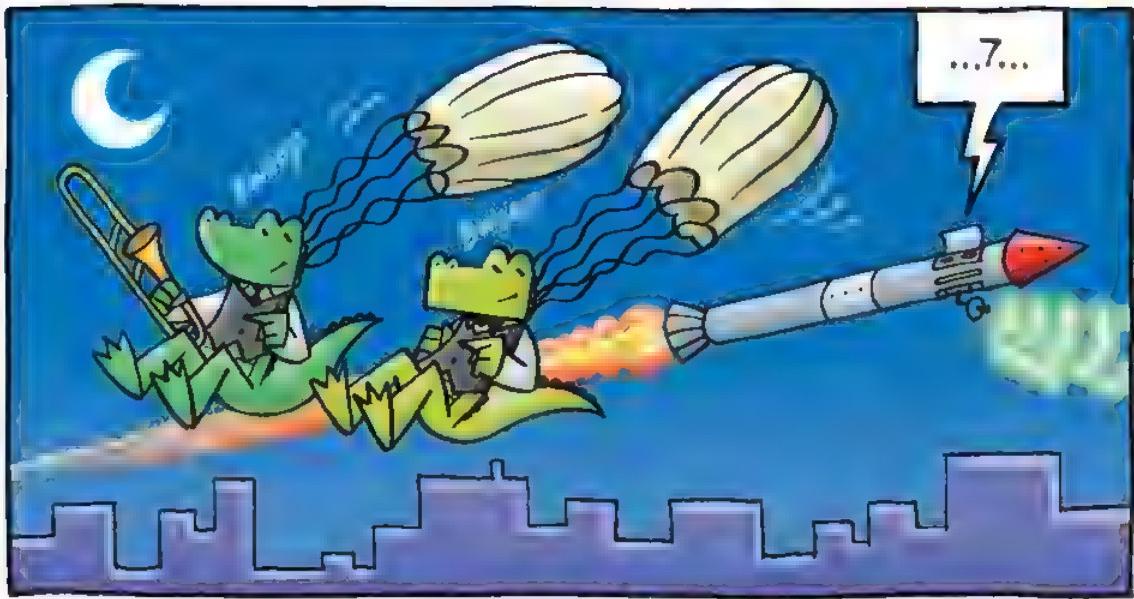

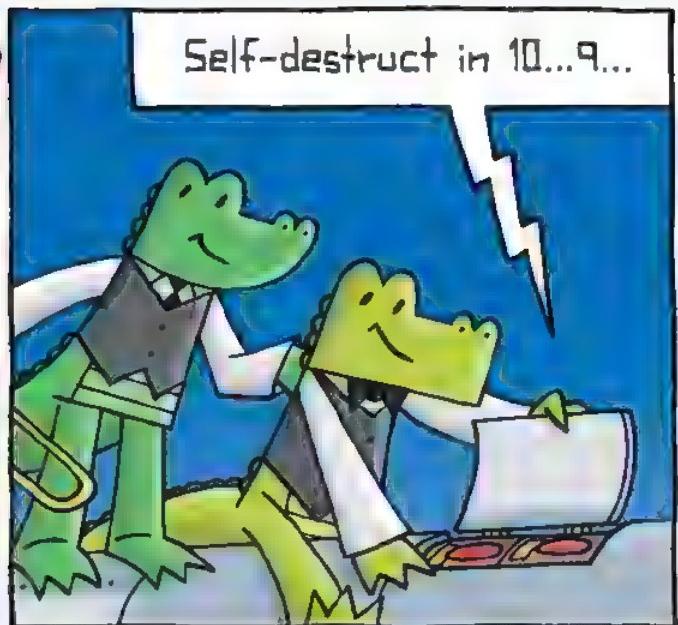

Brash is right! InvestiGators, do whatever it takes
to make sure the combinotron code on that rocket
doesn't fall into the wrong hands!

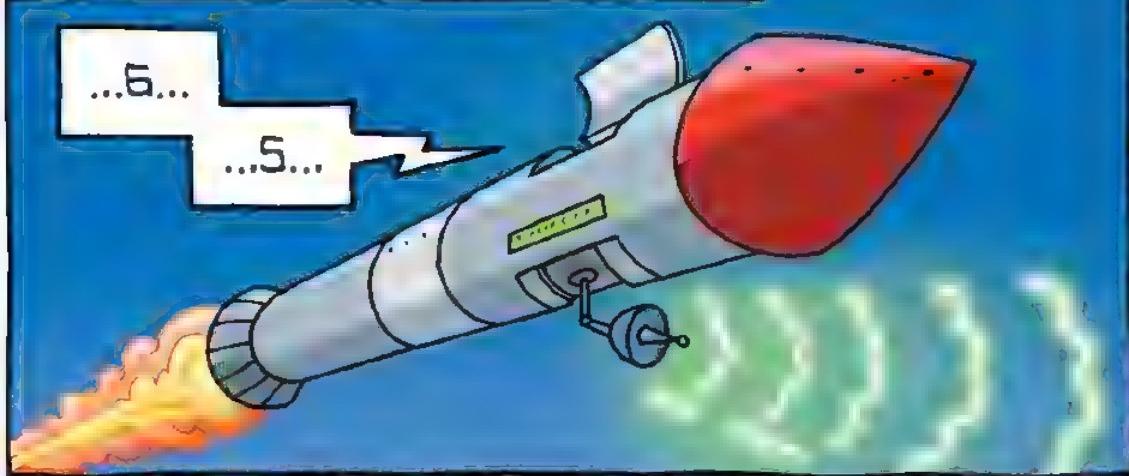

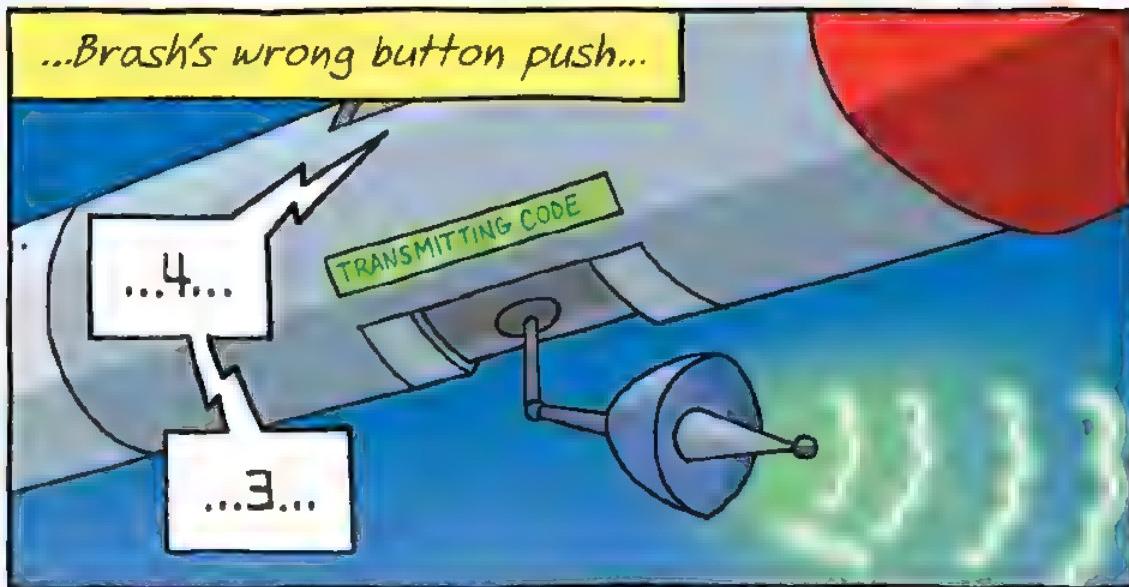

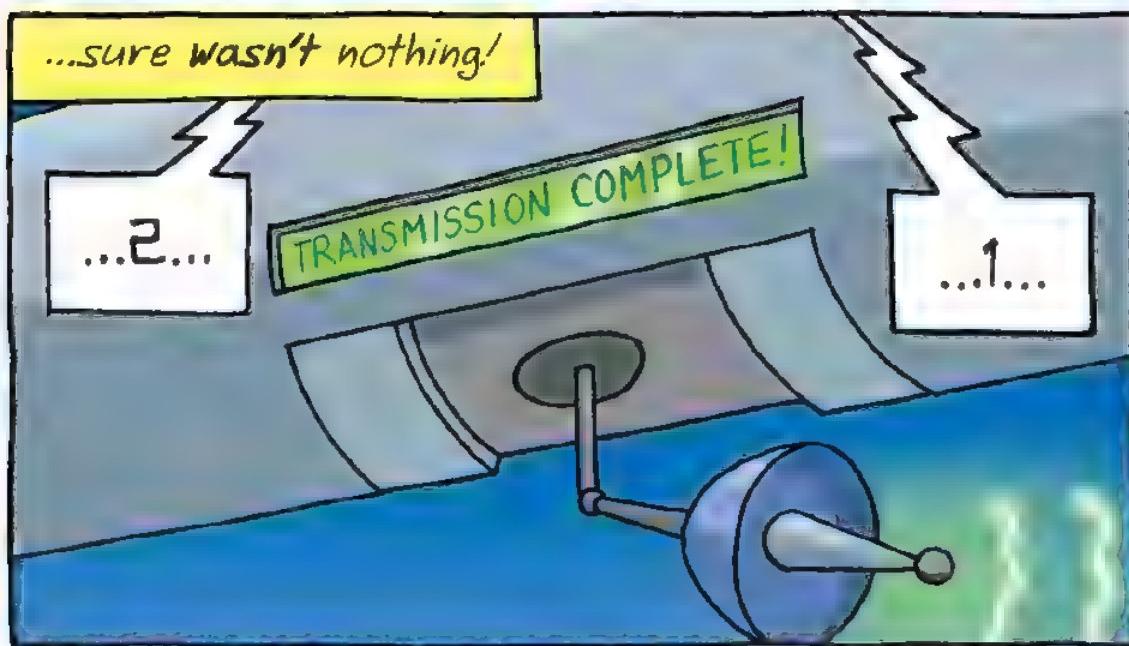

But unbeknownst to the Gators...

...Brash's wrong button push...

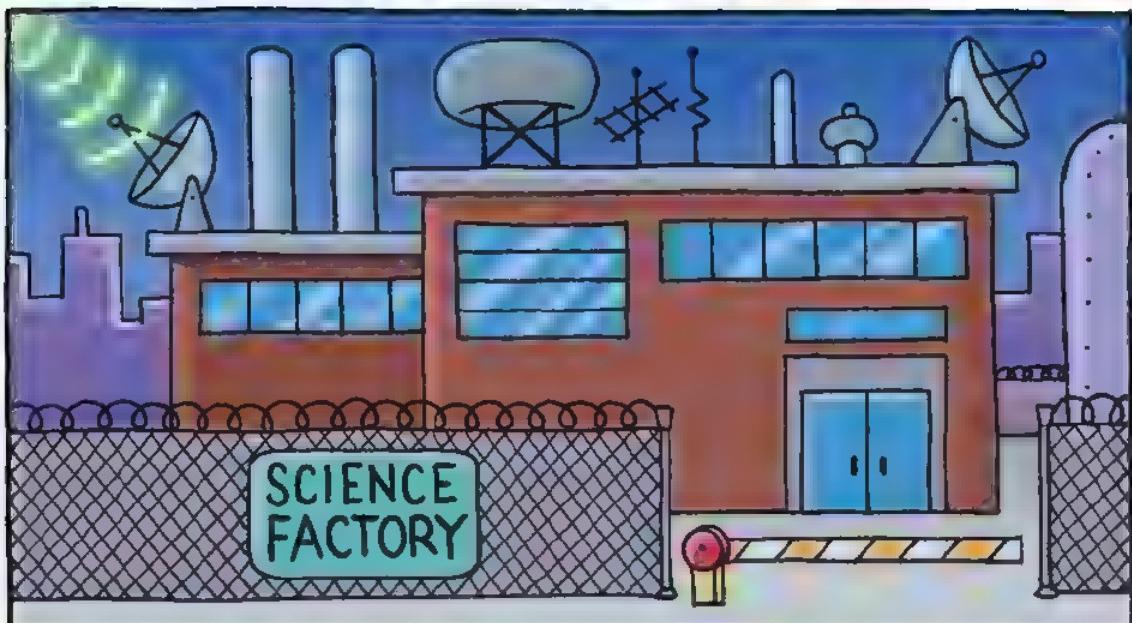

...sure wasn't nothing!

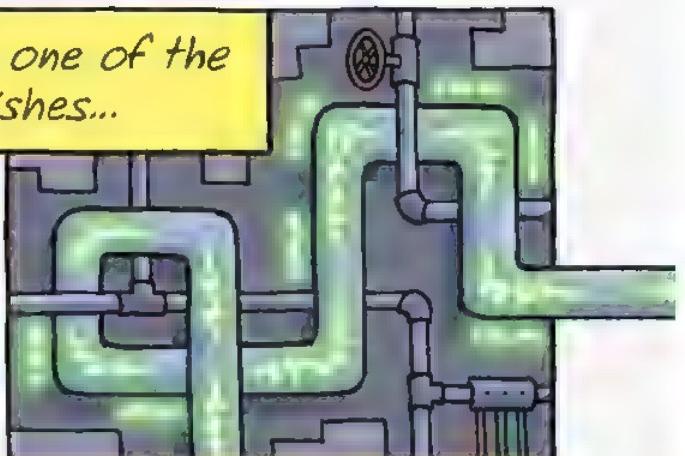

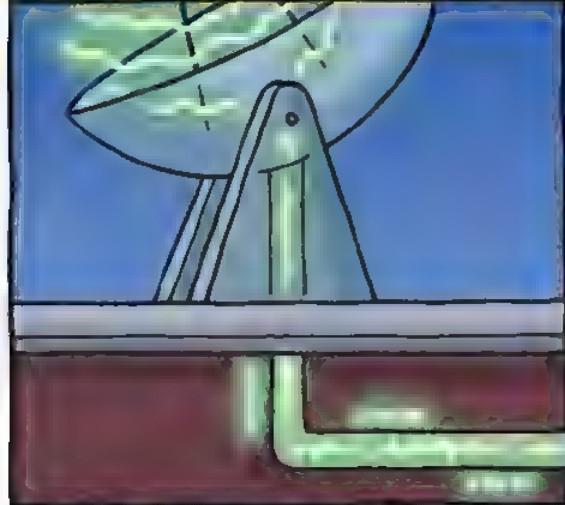

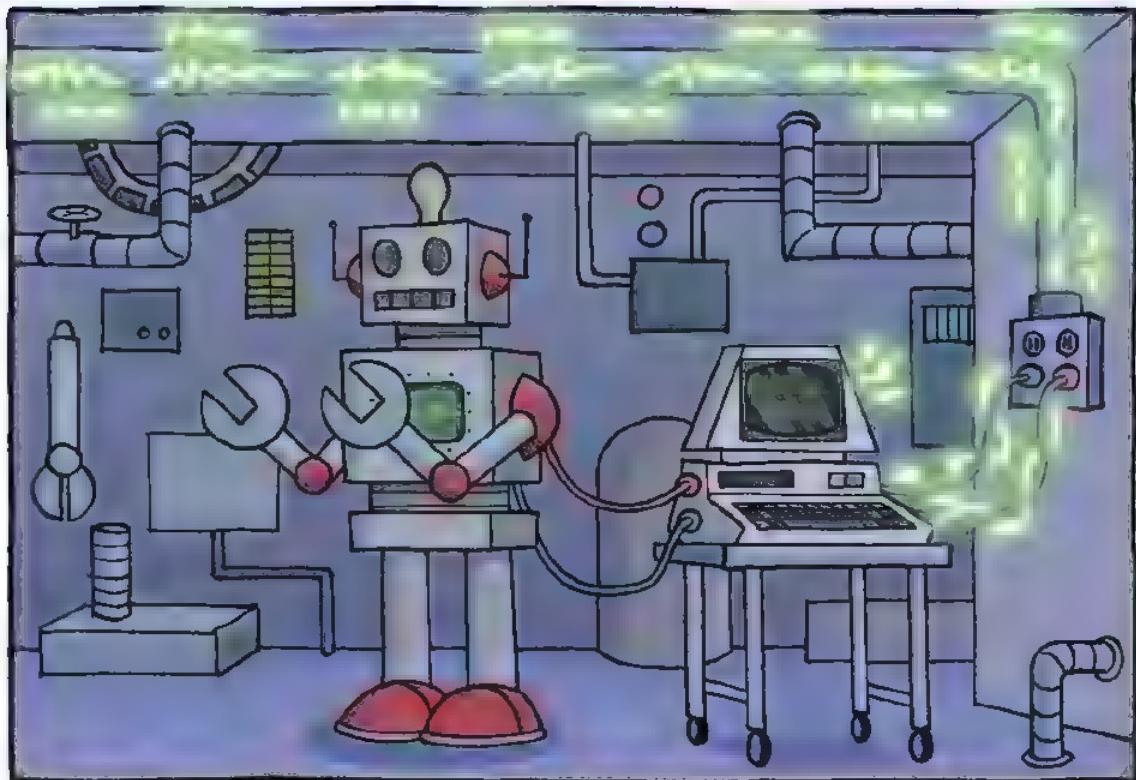

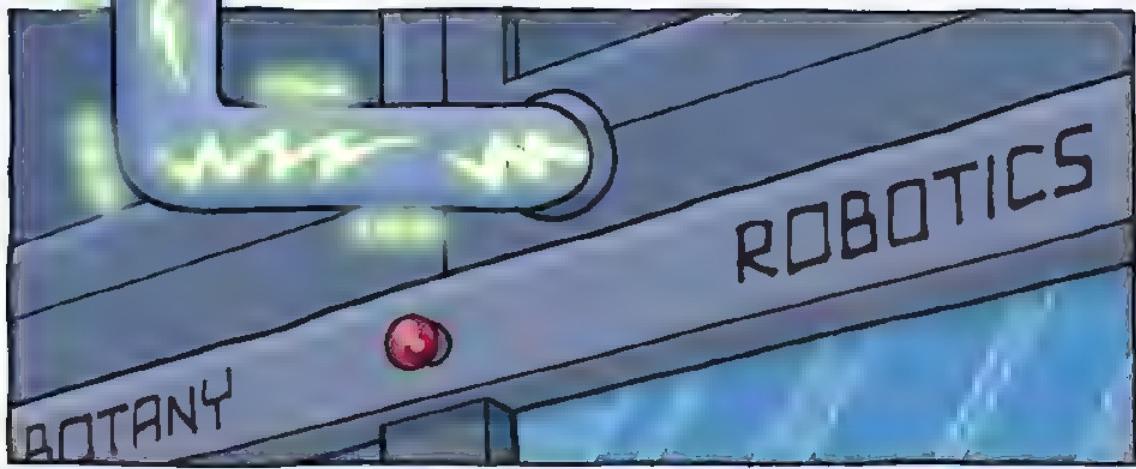

Or will it?

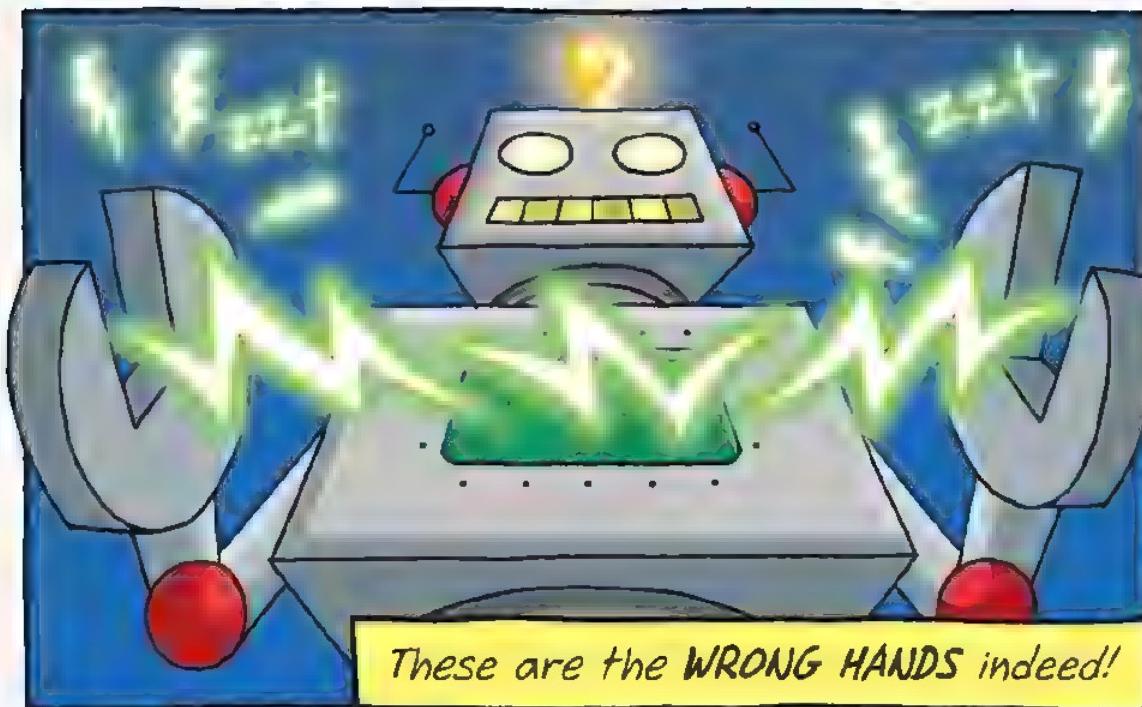

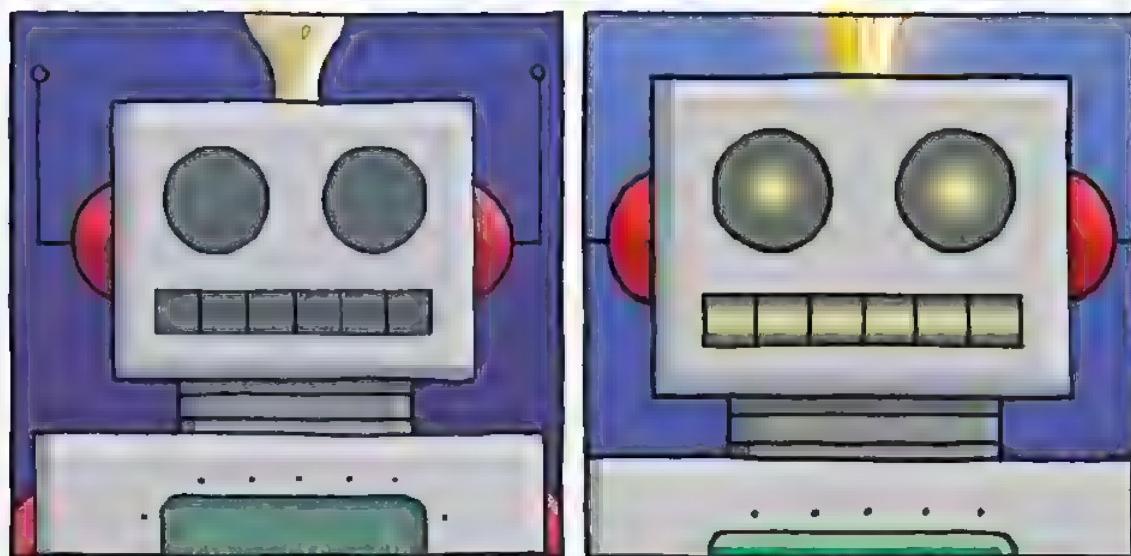

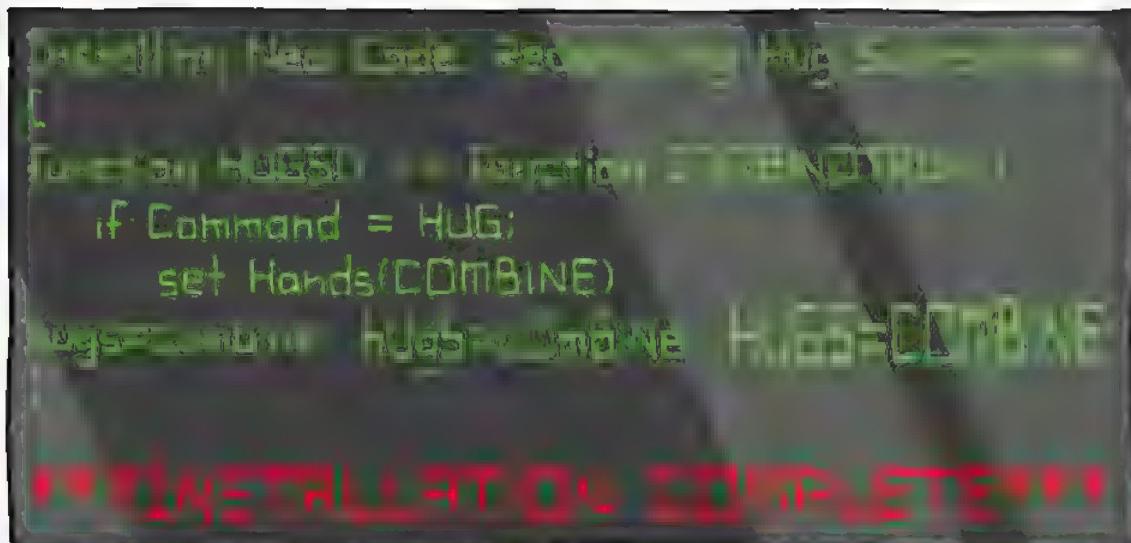

Accidentally intercepted by one of the
Science Factory's radar dishes...

...the combinotron code
worms its way through
the vacant laboratory!

Chapter 2

That was the scene moments ago when a rocket rudely interrupted a performance at the opera house!

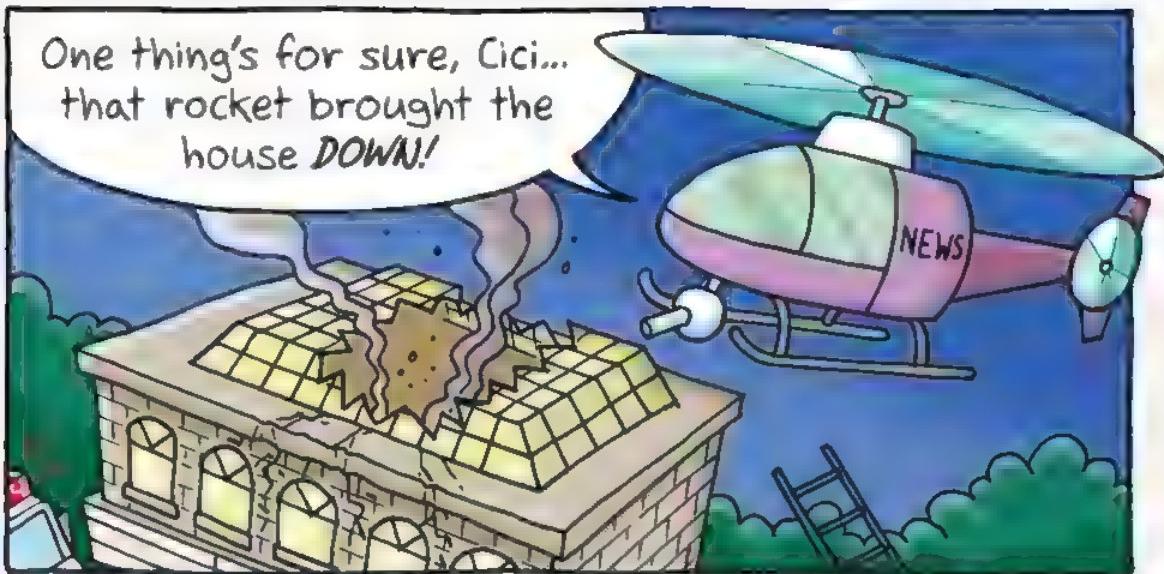

BREAKING NEWS: Opera House Hosts Rock(et) Concert!

One thing's for sure, Cici...

to program a COMBINOTRON...
whatever that is!
How or why there is a
rocket base beneath the

rocket was going, is still
unknown. But amazingly
enough, it was destroyed by...

wearing parachutes underneath their tuxedos!

Then I could FINALLY get rid of those Investigators and have my revenge.

Yes, I know who you are, **MANGO** and **BRASH**. You're not professional musicians! You're a *Special Undercover Investigation Team!*

And those parachutes came from your V.E.S.T.s! You **never** would've stopped that rocket if you didn't have your *Very Exciting Spy Technology*.

But that was before I got crackerized. When I, too, was an Agent of S.U.I.T.

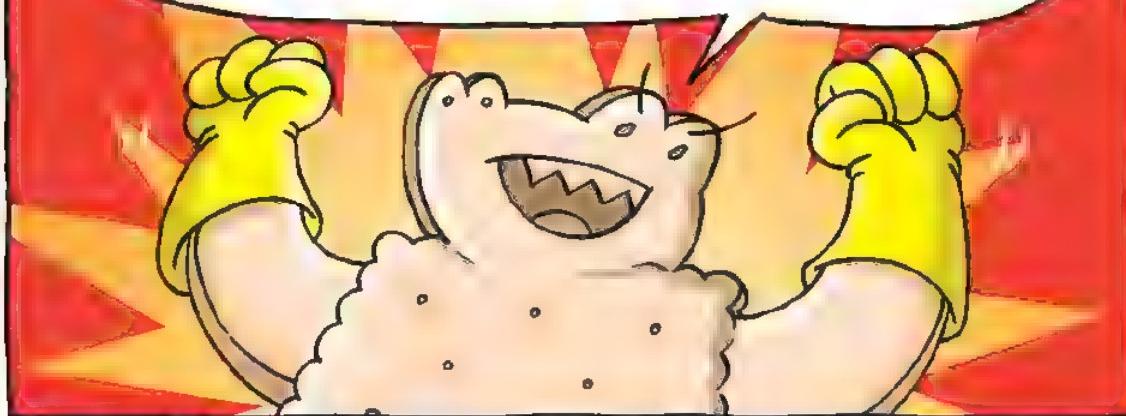

If only I still had a V.E.S.T. of my own.

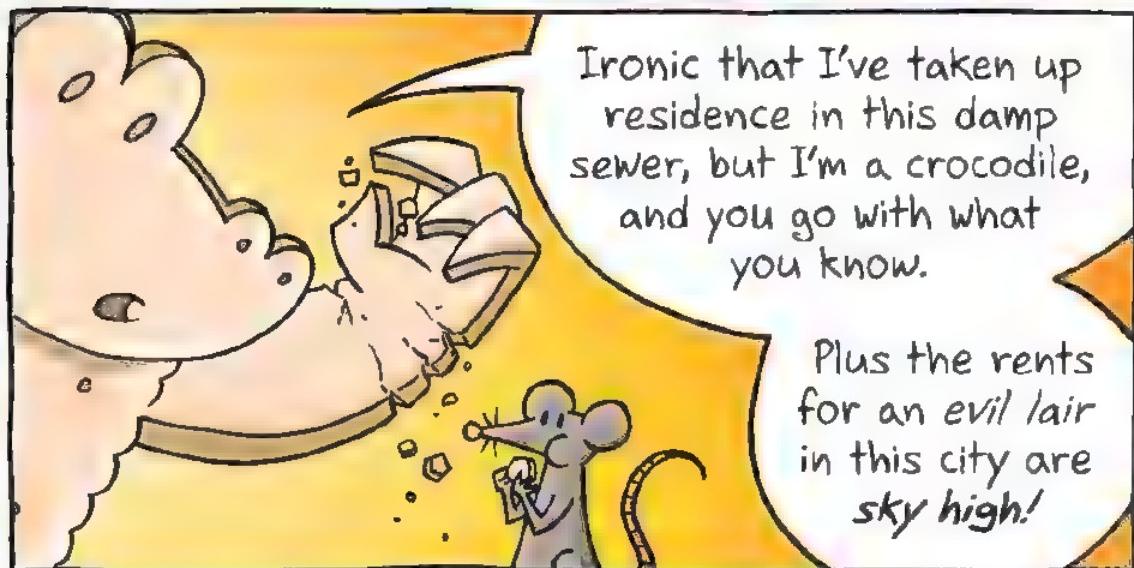

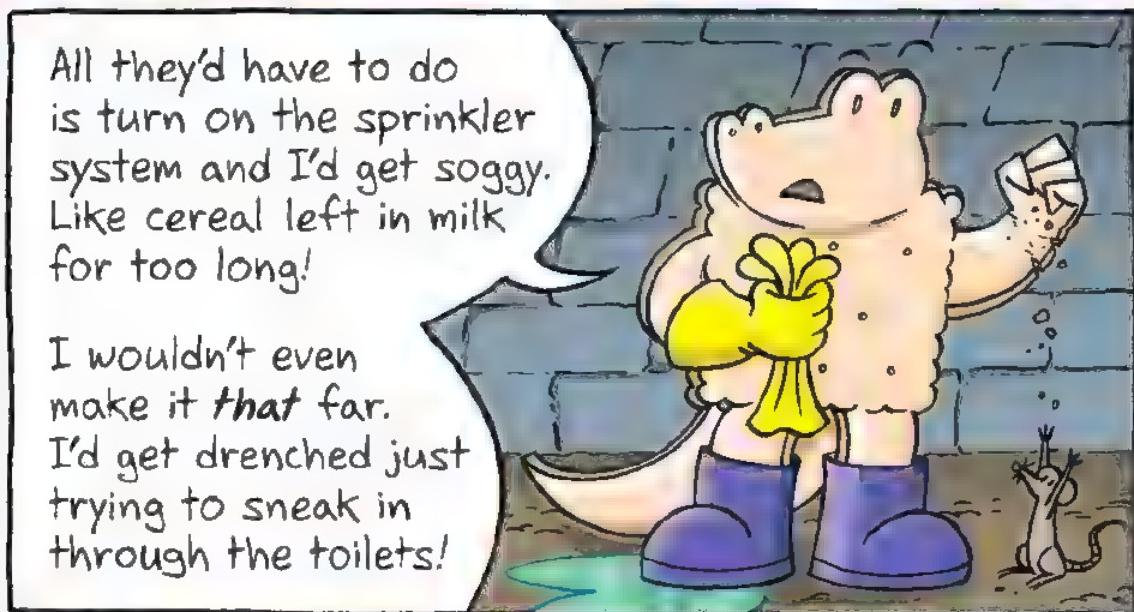

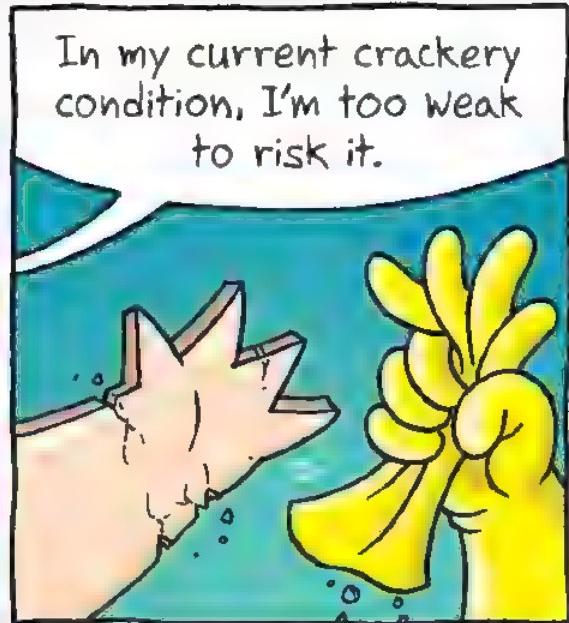

Now that I think of it, if I had a new V.E.S.T. I'd be evenly matched against those Investigators. And as a former agent, I know exactly how to get into S.U.I.T. headquarters—via the sewers!

I can break in, **STEAL** a V.E.S.T., and have all the gadgets it contains at my disposal!

If I can't get a V.E.S.T. for myself, then I'll do the next best thing... I'll form my OWN team of agents to oppose S.U.I.T.!

Oh, wait. That name's taken. Turns out it's an opossum ska band!

Food...?

THAT'S IT! We forgot all about the snake-armed monster!

The plumber?

If Dr. Morrow and Dr. Addison merged with their food because of the Robot Ghost, then the plumber-snake merger must also be because of the Robot Ghost!

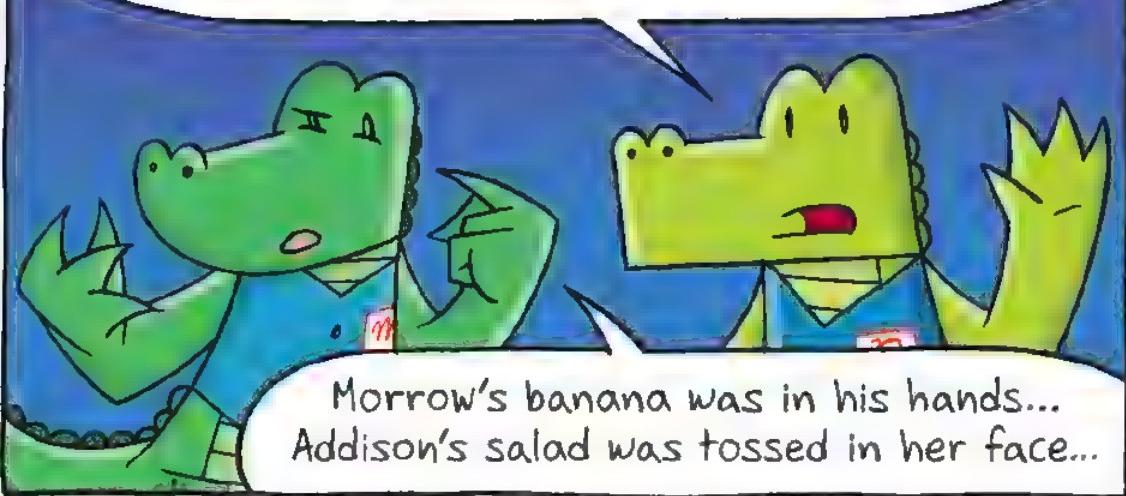

But... that plumber wasn't going to eat the snake—OH! But maybe the snake was going to eat the plumber?

No, no, forget the FOOD part, Mango. The B-Team's wrong about the Robot Ghost turning people into food.

My guess is the Robot Ghost **combined** them with their food only because that's what they were holding or touching at the time.

Sir, you've had two dozen bowls of free peanuts. If you're not going to order anything, we'll have to ask you to leave.

We interrupt another episode of COLE'S LAW for another Action News Now bulletin!

This is Cici Boringstories reporting from the hospital, where multiple patients seem to have been bizarrely transformed into food!

I'm speaking now with
Dr. Jake Hardbones,
Brain Surgeon.

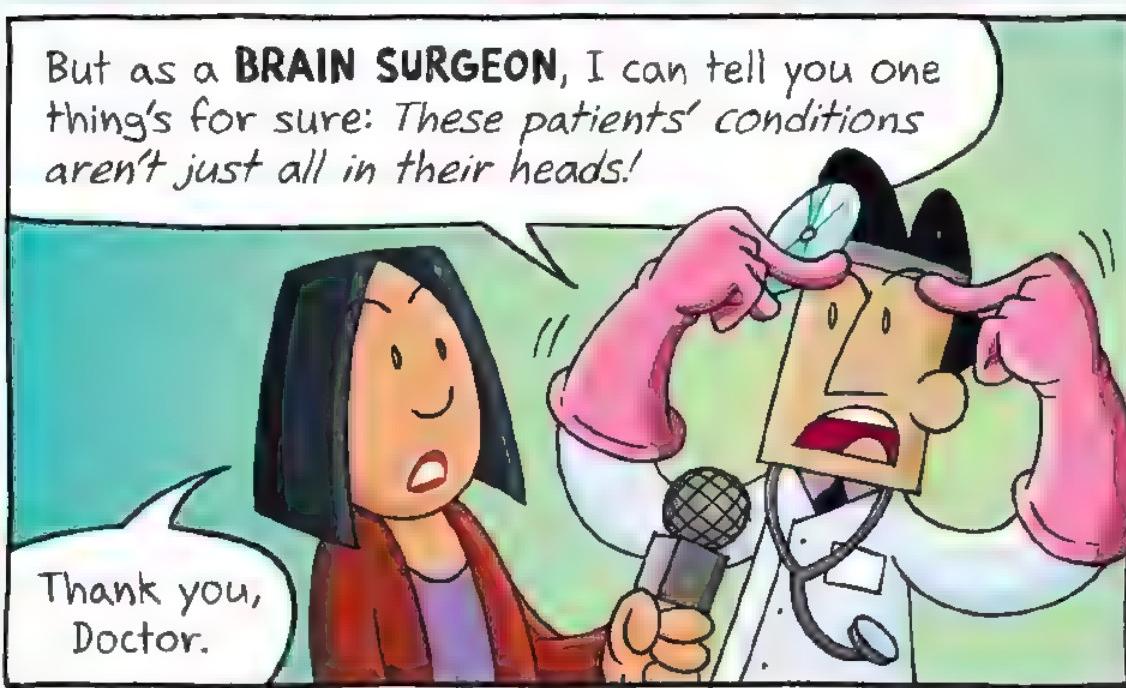

Doctor, could the conditions
of these patients be related
to the snake-armed
man who's still
on the loose?

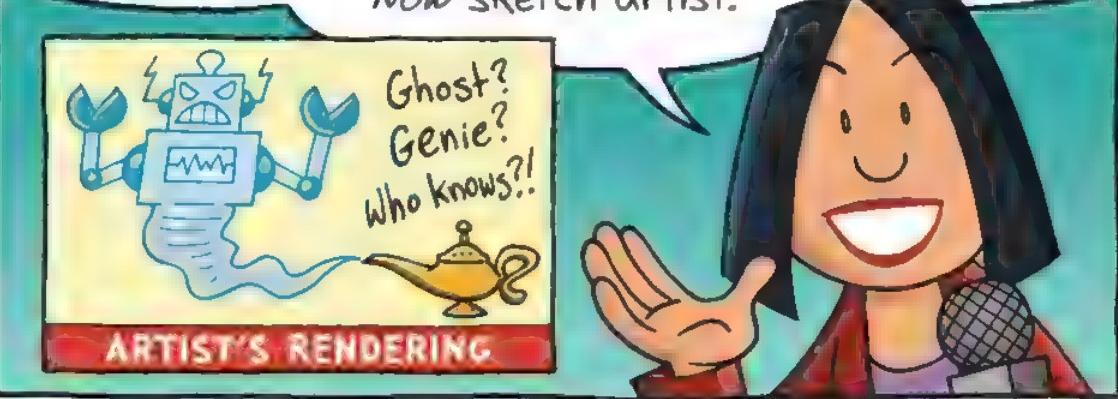

Well, Cici, I know a thing or
two about people who are
half-human, half-other thing,
so their condition isn't exactly
NEWS to me, thankfully.

But as a **BRAIN SURGEON**, I can tell you one
thing's for sure: These patients' conditions
aren't just all in their heads!

According to one patient, a robot came out of a lamp and turned her into a salad! So be on the lookout for a culprit matching THIS drawing by the Action News Now sketch artist.

Came out of a lamp, eh? Wait a minute... GENIES aren't real! A robot ghost, however...WOULD be able to travel through electrical outlets! Something tells me this robot is more than meets the eye.

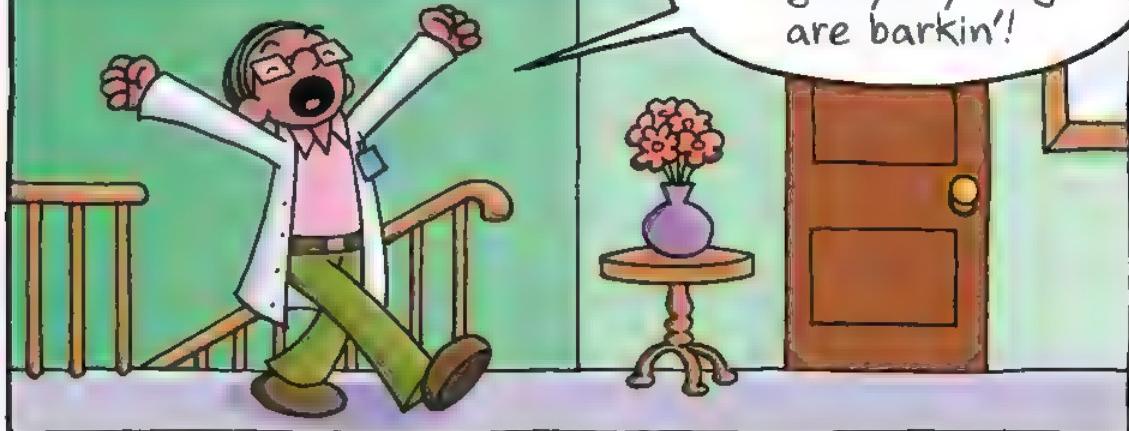

It would make the perfect addition to my team! Why should I break into S.U.I.T. to steal a V.E.S.T. when I could get this ROBOT GHOST to do it for me?

At the Head Scientist's home...

YAWN! Gee, what a long day. My dogs are barkin'!

And by "dogs" I mean all those **HOT DOGS** I ate.

Oog.

gurgle

Time to get in my jammies. But first, to the bathroom, to drop these dogs off at the kennel!

AAAAAA

-lligators, correct.

You should really put a lock on your toilet lid, doctor. Anyone could get in this way!

I'm Brash and this is Mango.
We're **InvestiGators**. Sorry for
walking in on you like this.

Really,
he walked
in on us.

Doctor, what did you tell the
badgers about PRIME ROBOT?

Hmm, I never talked to any badgers...

If they were questioning
scientists at the Science
Factory, it must have been
when I was out shopping for
replacement hot dog buns.

I wasn't gonna eat
BUN-LESS hot dogs!
I'm a **DOCTOR!**

Well, **DOCTOR**, this robot of yours is now a **GHOST**
who's been combining your coworkers with light meals!
And if we don't stop it, it might combine **YOU** next!

Did you say "combine"?
That word rings a bell...

Yeah... It definitely
strikes a chord...

Like...when we were
undercover as musicians...

=GASP! BRASH! THE
COMBINOTRON CODE
from that rocket!

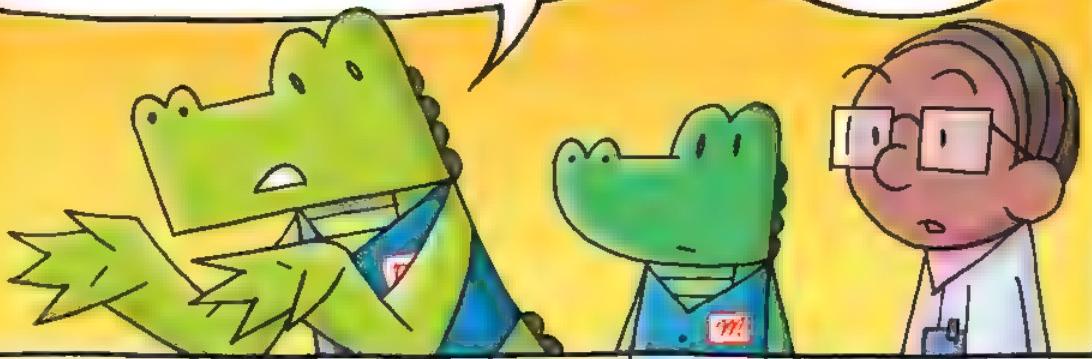

But...we destroyed the
rocket. How could the
combinotron code get
into the robot?

I'm sorry, Mango... Before I
pushed the self-destruct button...
I pushed the **other** comically large...
confusingly labeled...enormous...
red button.

Oh, yeeeahh...
I **DO** remember
that...

I didn't realize it at the time, but I guess the rocket did transmit the combinotron code. And it did end up in the wrong hands...

PRIME
ROBOT'S
hands!

A rocket transmitted combinotron code? It must have been intercepted by the Science Factory's radar dishes and downloaded into Prime Robot's hugging subroutine. Which means...I had him plugged into the **WRONG OUTLET!** Oops. Silly me!

But this also explains why he went haywire when I told him to hug Dr. Morrow. Prime Robot's hands weren't built to handle the raw power of a **COMBINOTRON!**

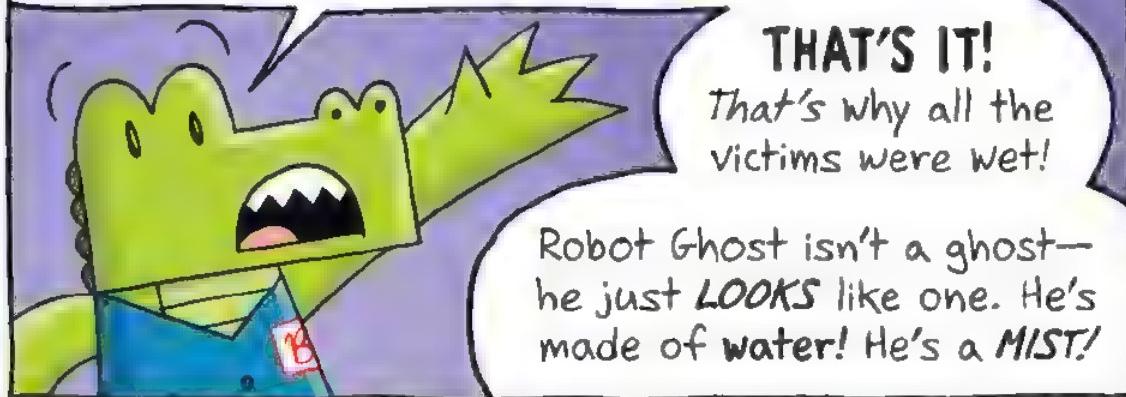

So...how did Prime Robot become a ghost?

When the Science Factory flooded, he short-circuited. As far as robots go, that's as good as dead! But to come back as a ghost?

The ability to combine things wouldn't make him do THAT.

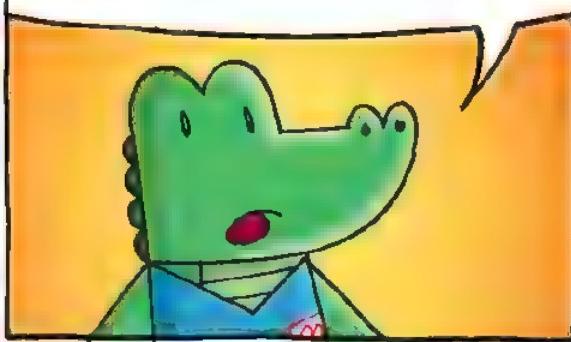

What if...when the robot short-circuited in the flood...the **COMBINOTRON** powers backfired...and combined PRIME ROBOT with the WATER?

Add to that the fact that the robot is ALSO made of electricity!

So THAT'S how he's been coming out of electrical appliances. He can travel through power lines!

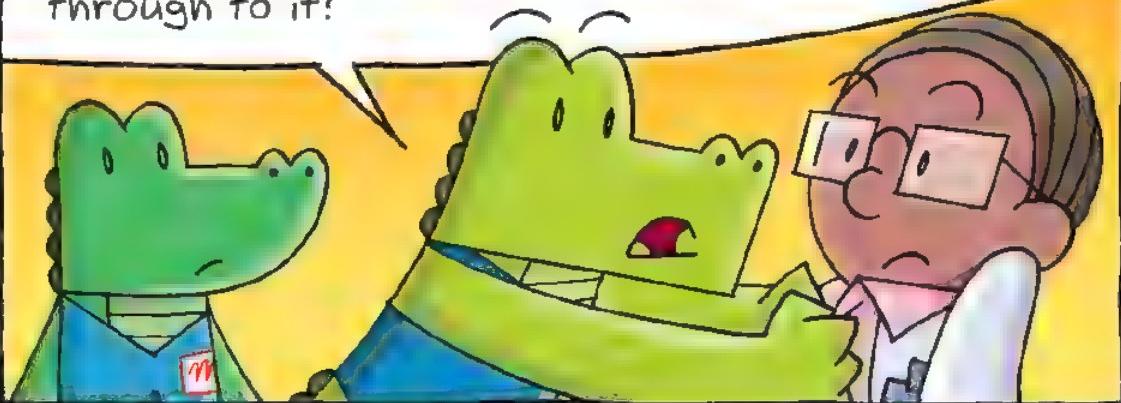

Dr. Morrow did say the Robot Ghost disappeared into an outlet when he first saw it at the lab.

ELECTRIFIED MIST!
It's so crazy it's the only thing that makes sense!

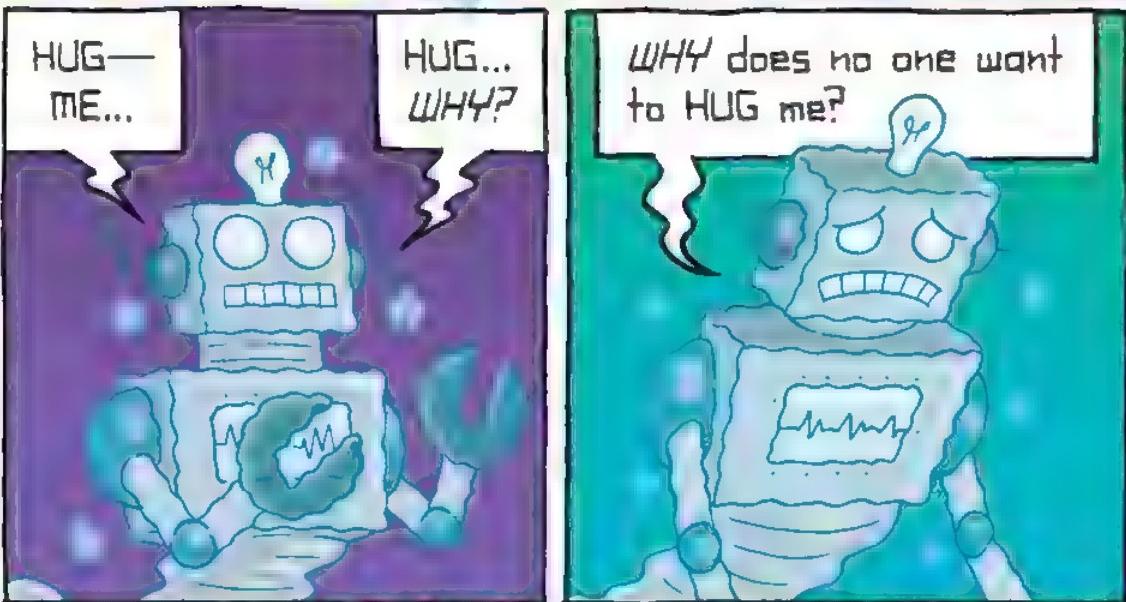

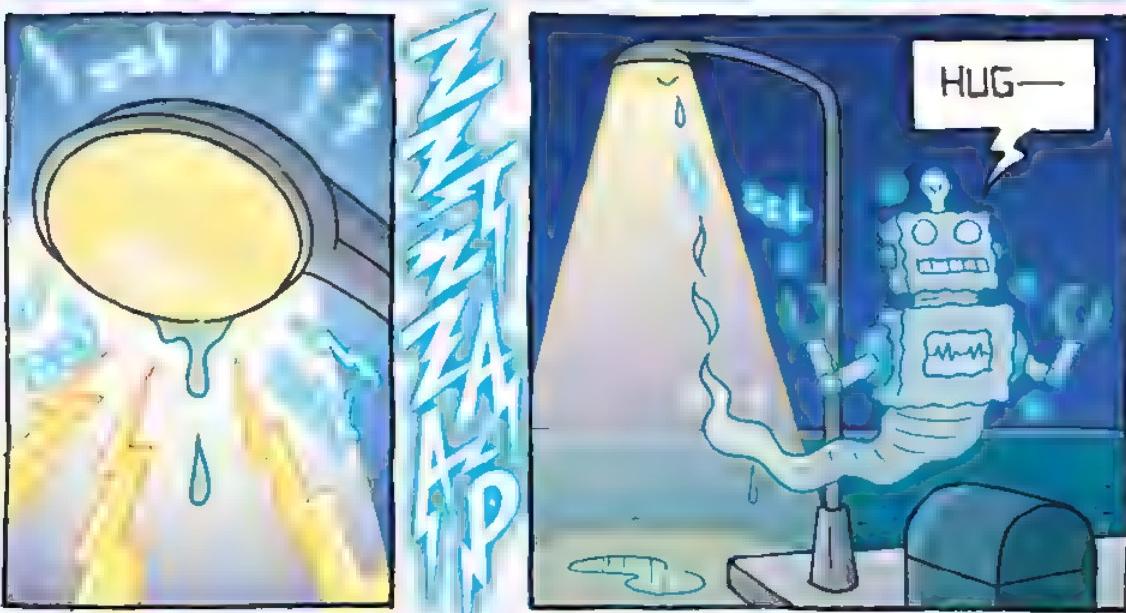

Doctor, we've got to find a way to stop your robot and uncombine these people. Is there any way you can think of to communicate with it? To get through to it?

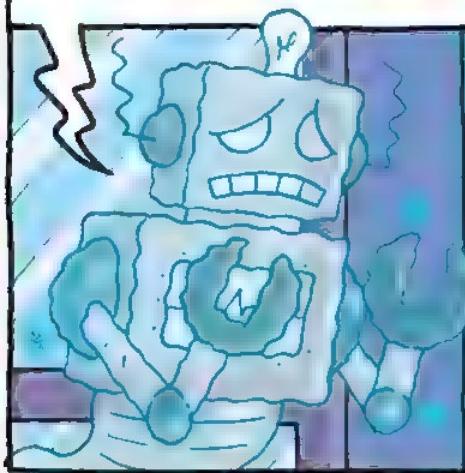

Chapter I've lost count

WHAT is wrong with ME?
What... What AM I?

Once again, viewers, beware
of a **ROBOT GENIE** who
comes out of electrical
appliances...

...and attacks people
while they're eating!

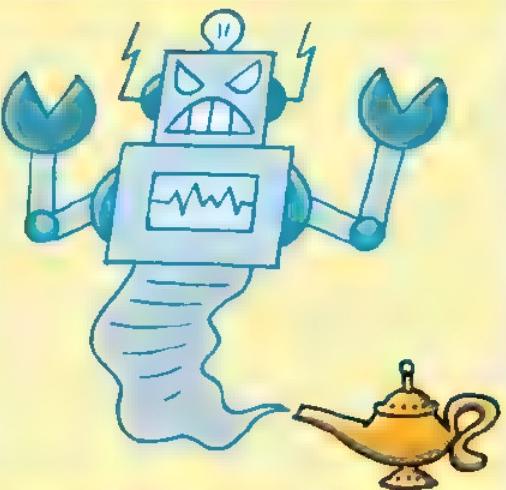

So if you're watching
this during dinner...

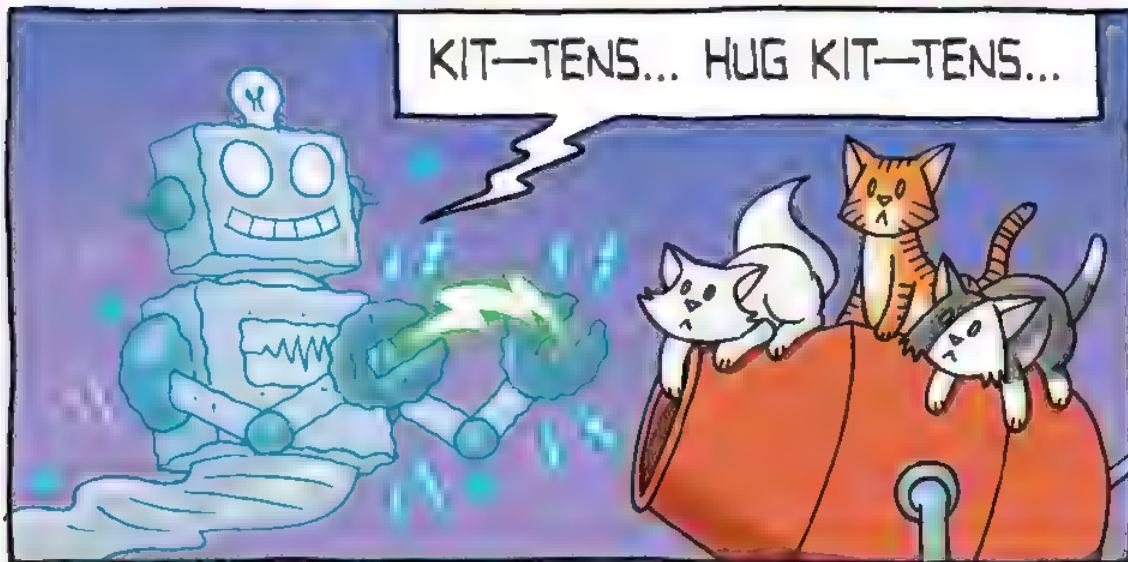

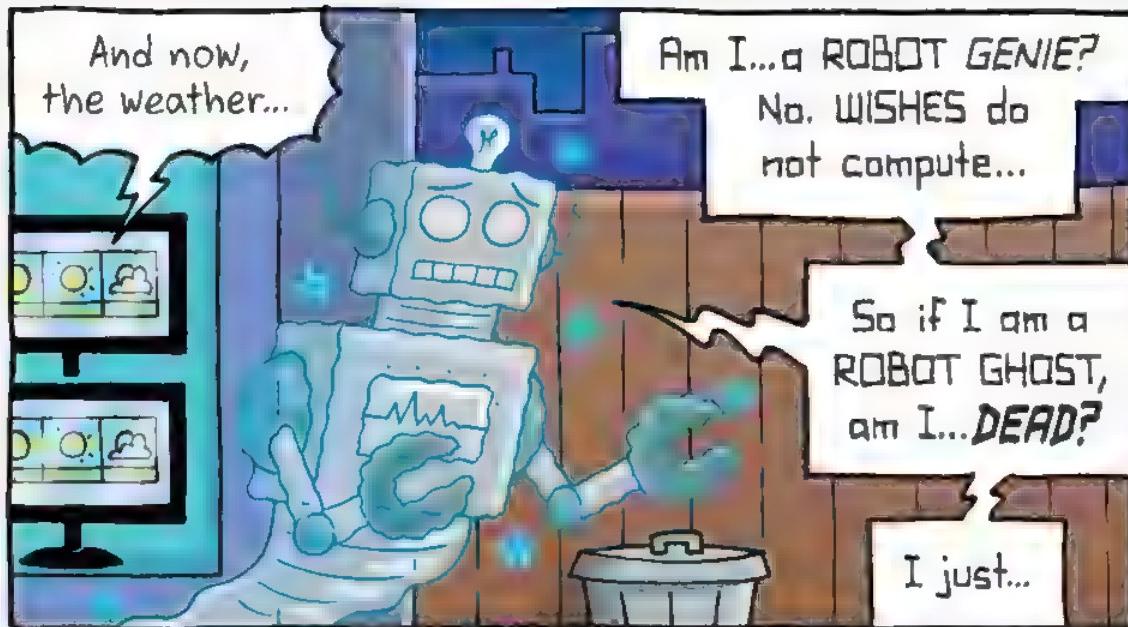

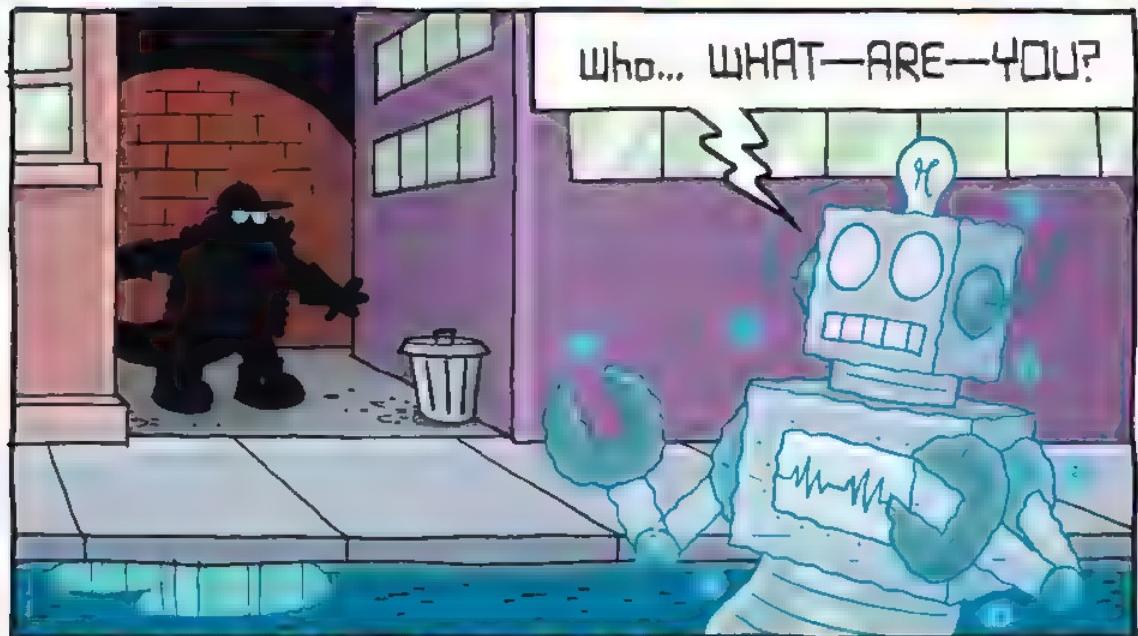

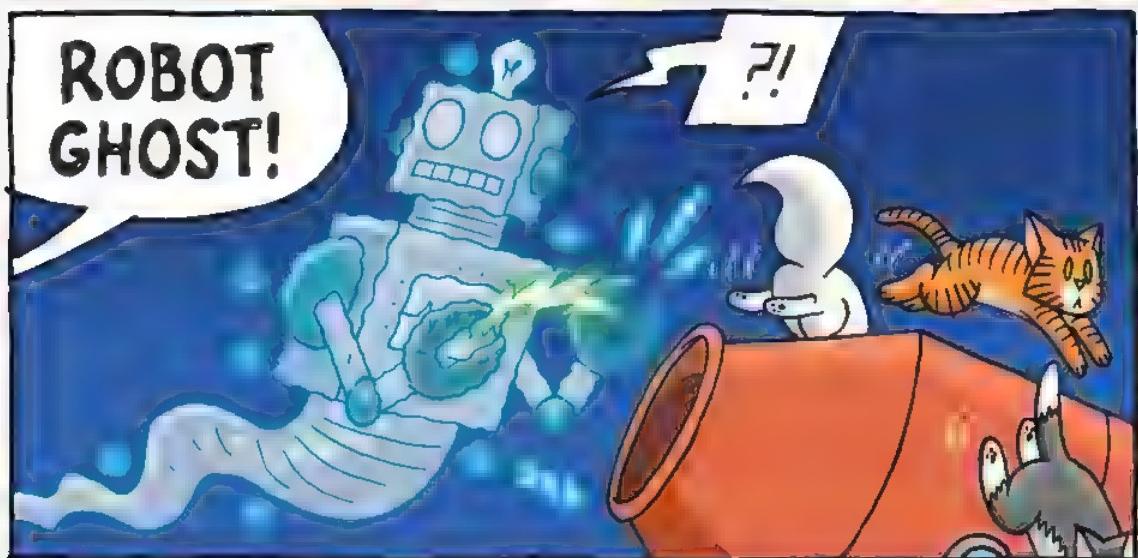

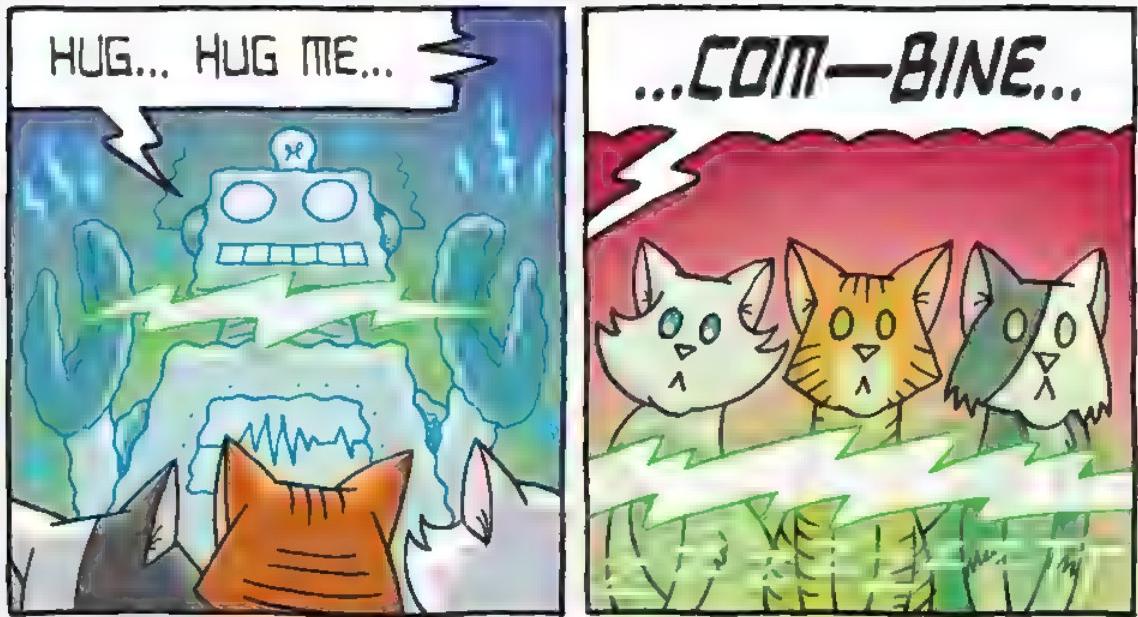

...PUT DOWN THAT TACO!

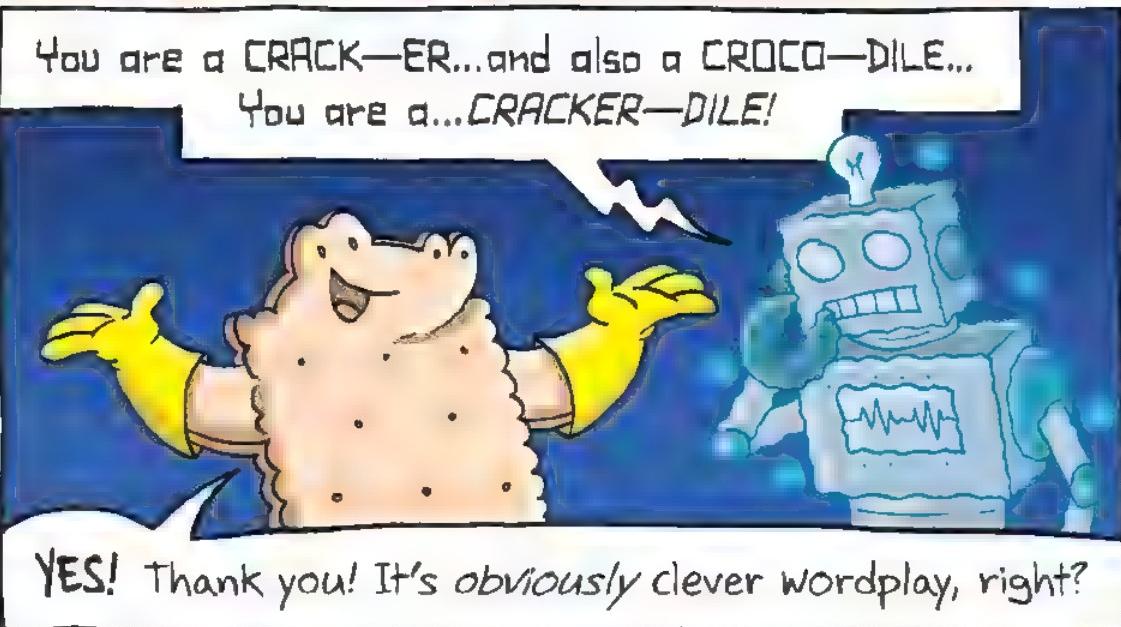

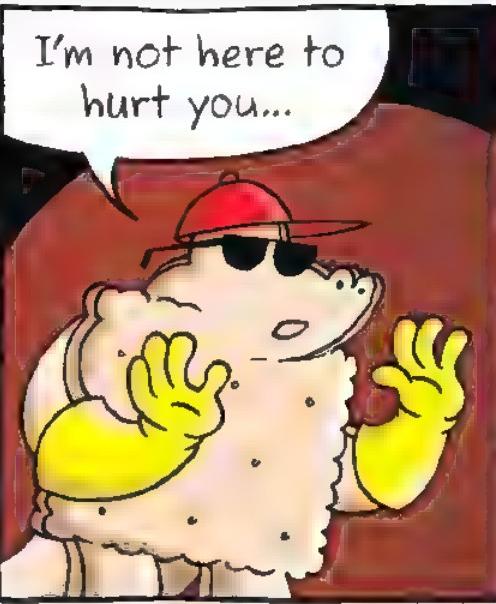

Here again is the
artist's rendering of
this transparent terror...
Which sort of looks like
it may be a ghost? But
that lamp is a clear sign
that it's a genie, so
I'm sticking with **ROBOT
GENIE**. But the only wish
this genie grants...is a
night in the hospital!

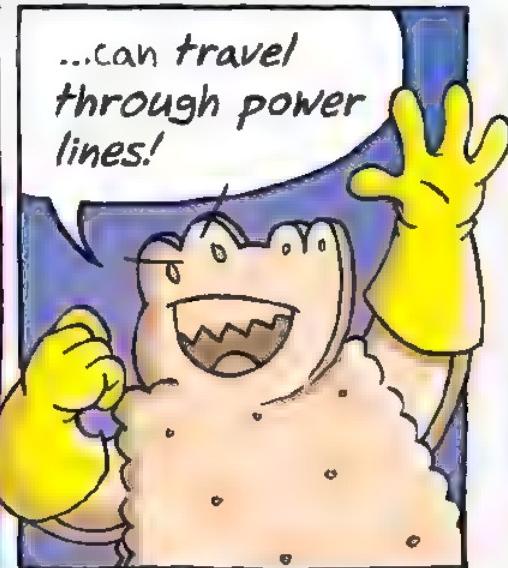

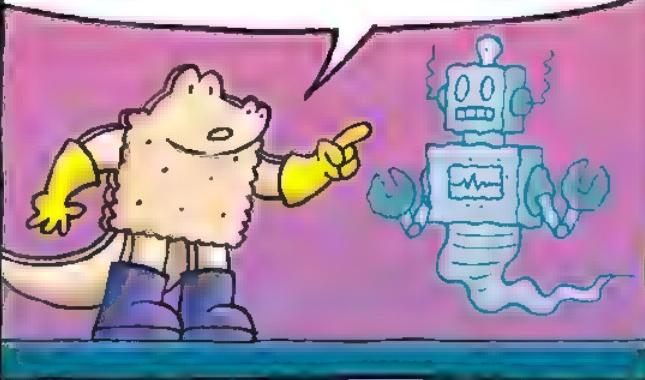

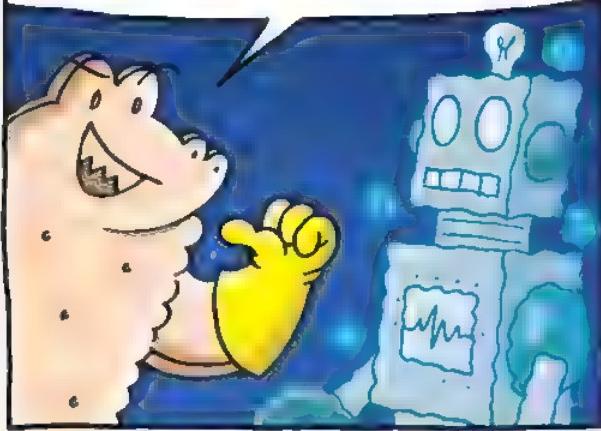

YES! Thank you! It's obviously clever wordplay, right?

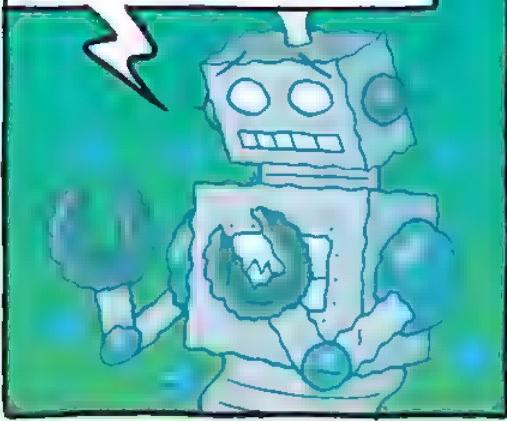

But that's not what I want to talk about. I saw you on the news. YOU, Robot Ghost...

Yes, I figured it out! I can put two and two together.

Can...I put two and two together?

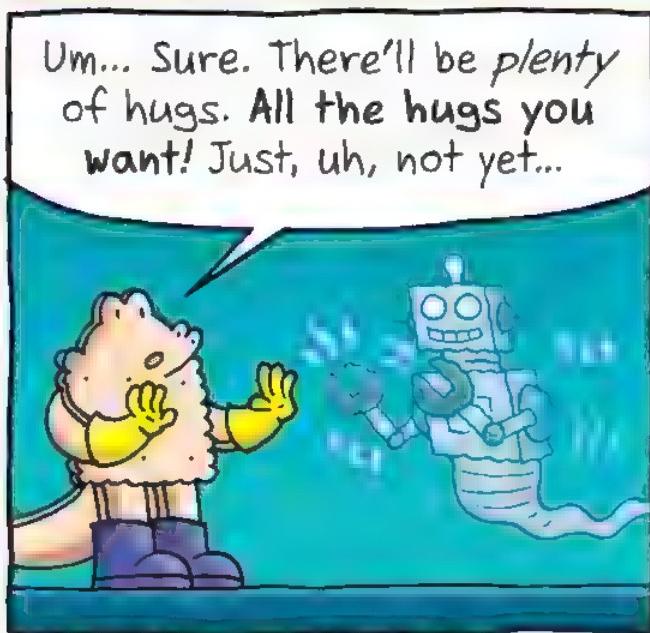

Well, if you've figured out how you'll be of use to me—I MEAN—how you can HELP me, then yes.

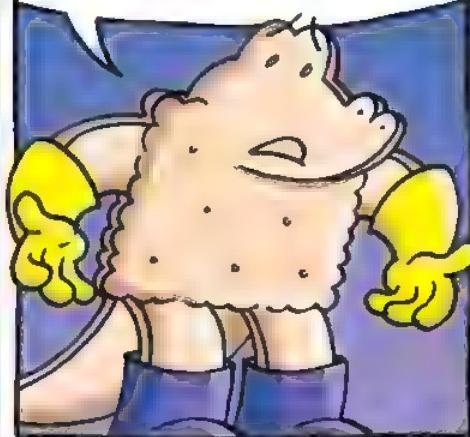

Will there... be HUGS?

Um... Sure. There'll be plenty of hugs. All the hugs you want! Just, uh, not yet...

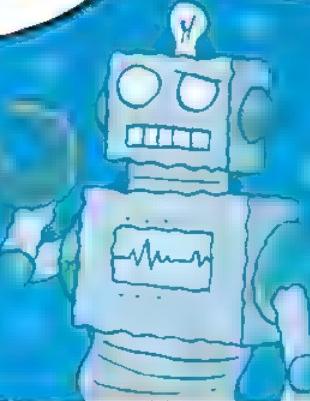

I am still but a brittle, twice-baked saltine cracker.

BEFORE the hugs, there's this THING I want you to get for me. Once I have that, my crumby carcass can handle hugs.

And I will finally be stronger than just a saltine!

Stronger like...a BAGEL?

No, something even STRONGER!

A stale PITA?

What? NO!

Really, really old CROUTONS?

Burned PIZZA CRUST?

NO, NO! Stop thinking bread products!

Uncooked PASTA?

Is it bigger than a BREAD BASK—ET?

JUST FOLLOW ME!

Chapter something or other

After Prime Robot first malfunctioned, I realized the weird code I saw in his **hugging subroutine** must have been the cause. I tried deleting the code, but he had already been unplugged from this computer console, so it had no effect.

Now, having learned it was **combinotron code**, I've discovered that the code *itself* will combine with any other program it encounters.

It combined with Prime Robot's hugging program, and now his hugs combine things. So, how do we stop it?

Now that I know what code I'm looking at, I can rewrite Prime Robot's main program so that it separates the combinotron code from his hugging subroutine.

That will take the combinotron powers out of his hands, and he'll no longer combine things by hugging them.

The trick will be finding a way to get him to download this new data. In his gaseous form, we can't just plug him into a computer.

He's a mist. Can't we just...upload to the cloud?

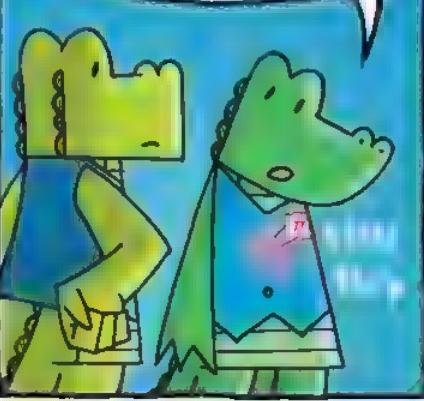

Hmm... If hugs caused HIM to combine with WATER... Can you invent a way for him to hug the DATA?

We heard you designed him with true human emotions. Maybe if we appeal to—

Oh, hey, someone's trying to contact the B-Team.

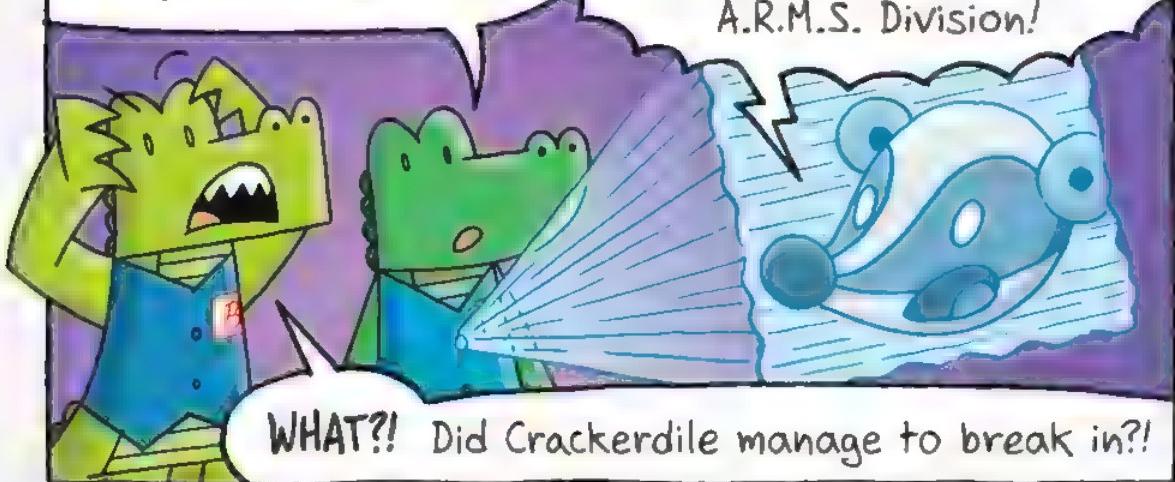

That's odd... The signal's coming from inside S.U.I.T. headquarters!

Turn on the video feed!

It **IS** the B-TEAM!
Bongo and/or Marsha!

Mango! Brash! A V.E.S.T.
has been stolen from the
A.R.M.S. Division!

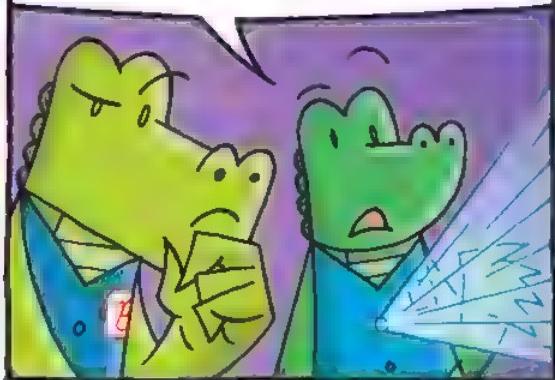

WHAT?! Did Crackerdile manage to break in?!

NO, it was **ROBOT GHOST!**

And only **YOU** can stop him, Investigators!

But...why? How would Robot Ghost know about S.U.I.T.? Or our V.E.S.T.s?

I bet it **WAS** Crackerdile! Even using the sewers, he could never get in and out of S.U.I.T. as easily as a mist that can travel through outlets could!

He must have convinced Robot Ghost to steal a V.E.S.T. for him!

Luckily, just like C-ORB, every V.E.S.T. has a tracking device installed. But we'll have to find it before Crackerdile gets his crumby claws on it and turns the tracker off!

Doctor! We need a way to get the new code into Prime Robot! You've got to invent harder than you've ever invented before!

Cue the scientific inventing montage!

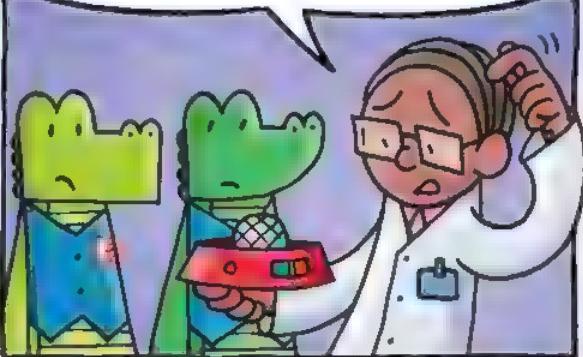

We don't have time for a montage! Let's just turn the page to where it's finished!

IT'S FINISHED!

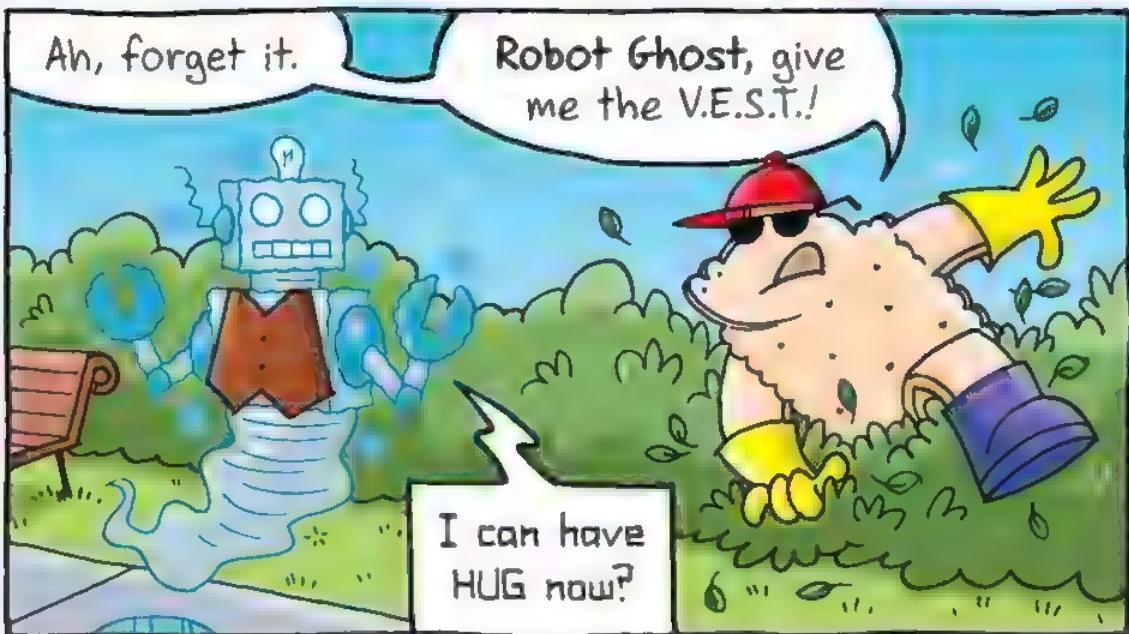

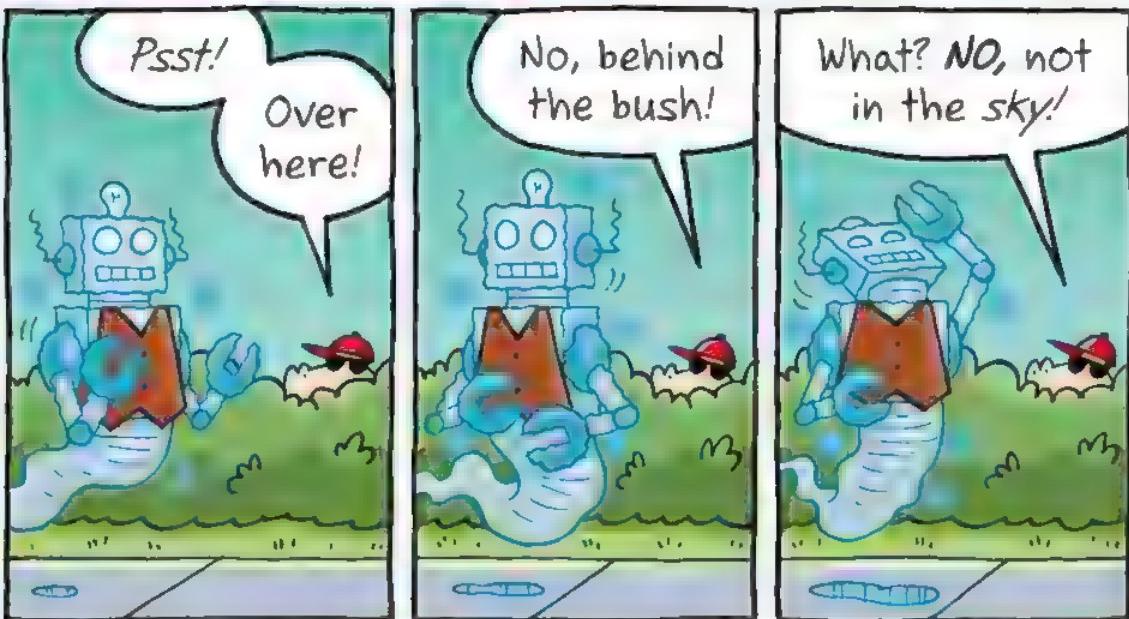

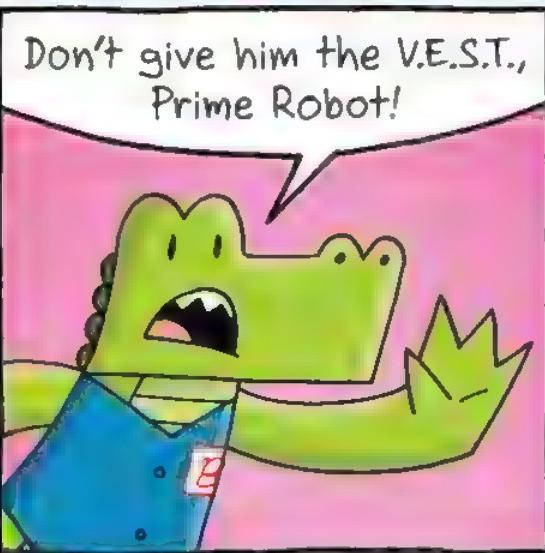

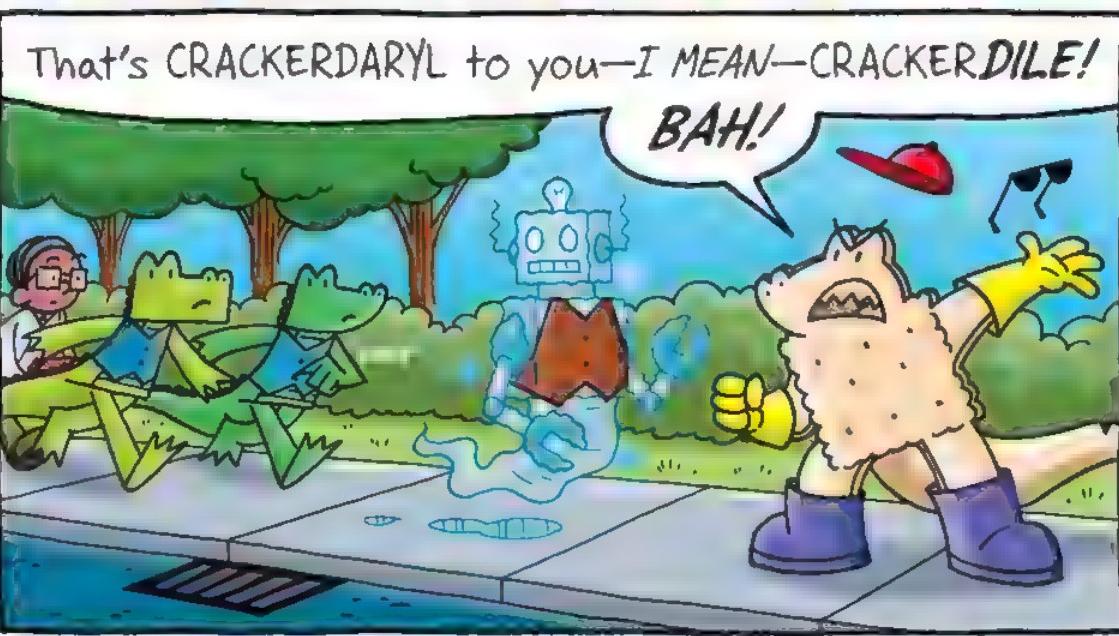

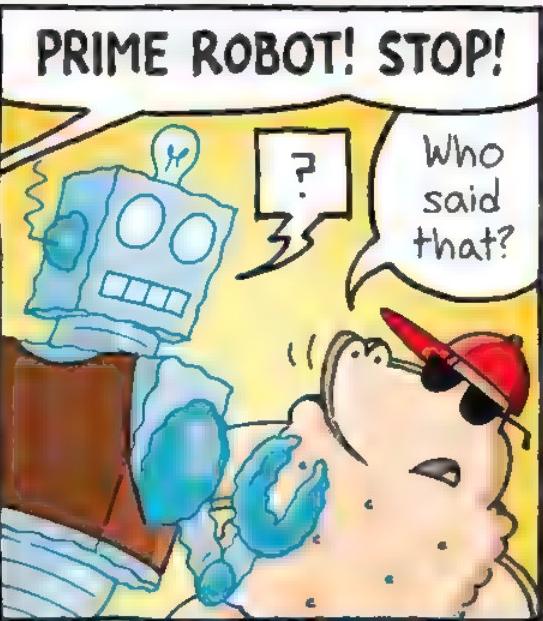

I think? It's hard to tell, since we skipped all those pages that would've shown me building it.

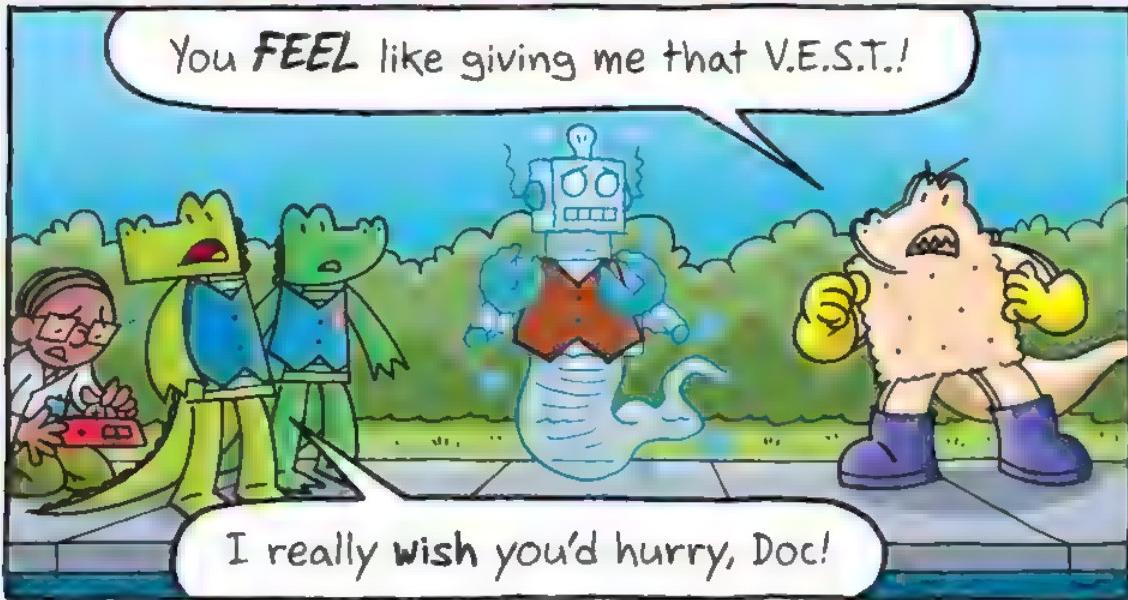

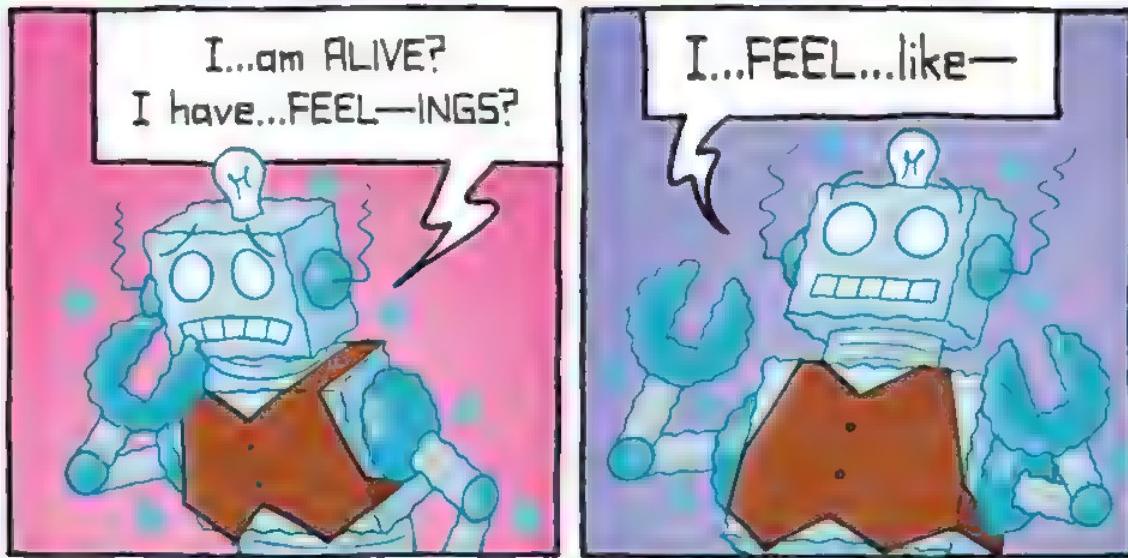

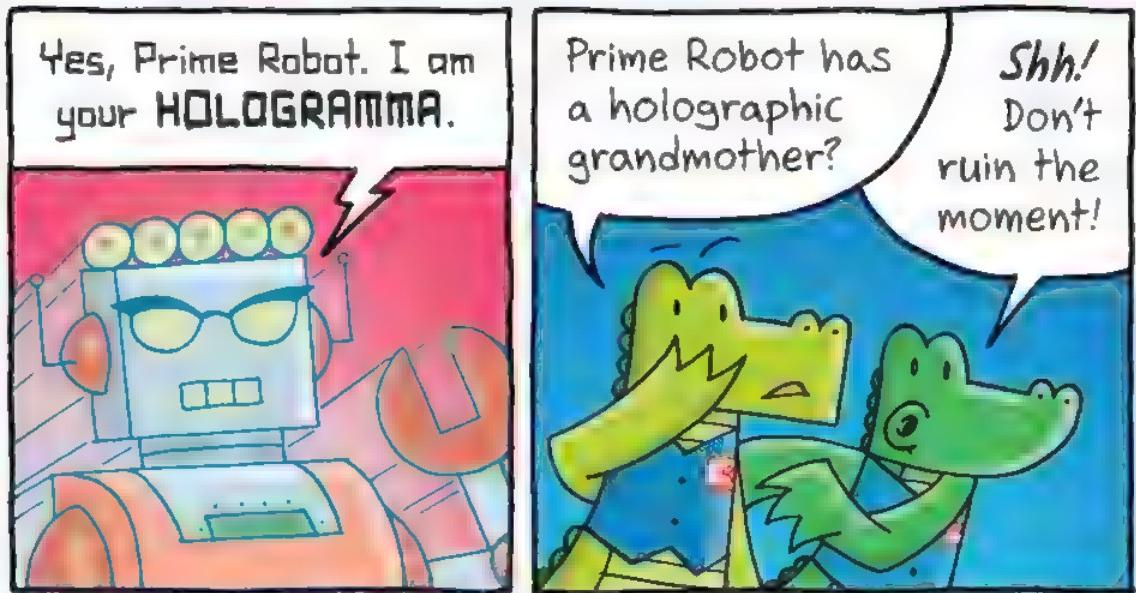

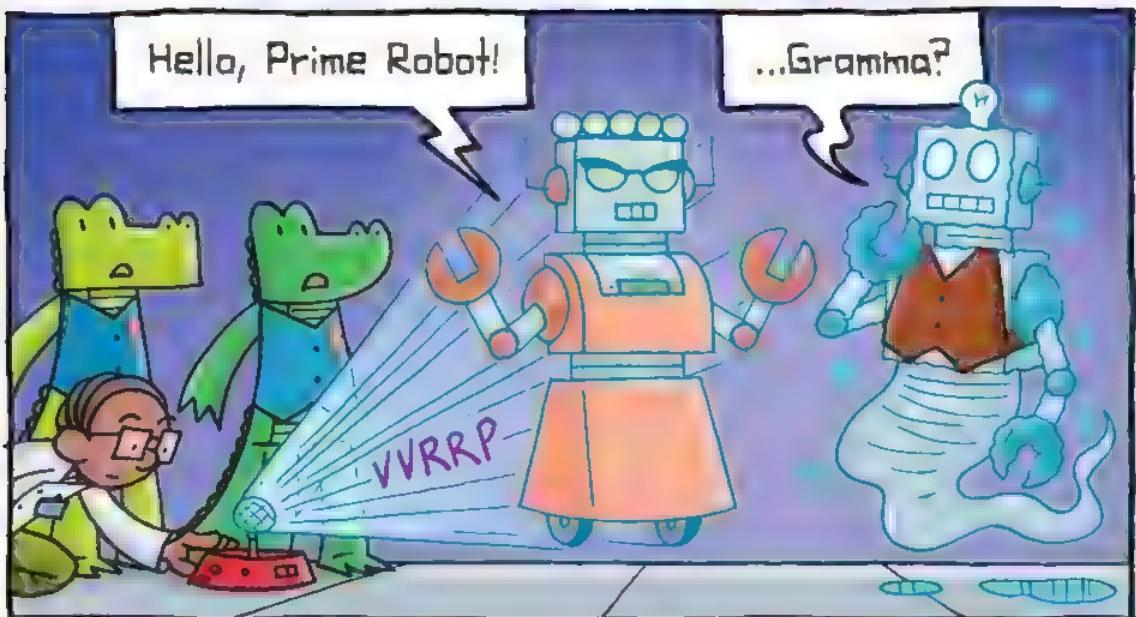

Then there's no time to lose!
Let's follow that V.E.S.T.!

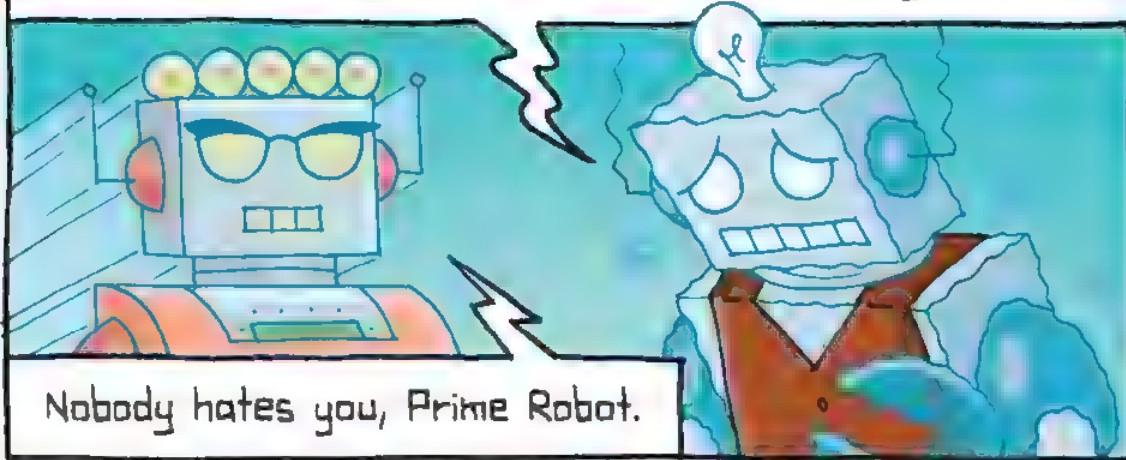

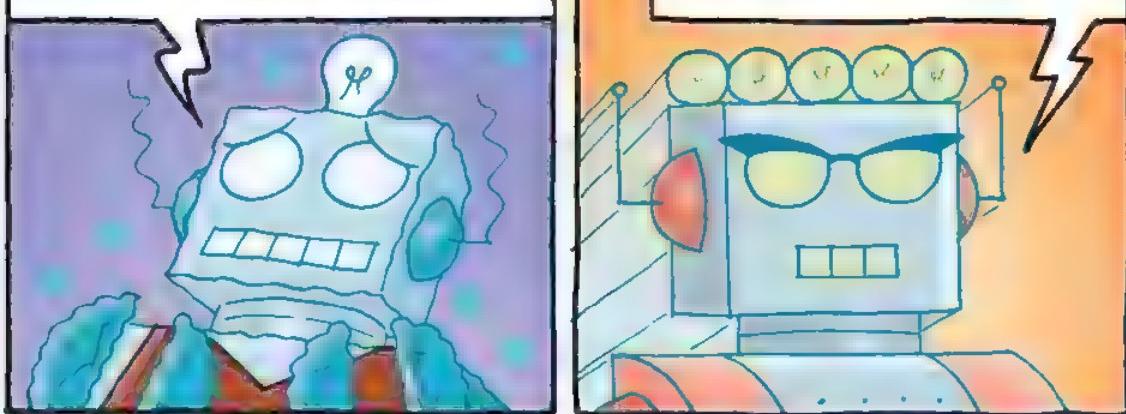

Gramma... I just want to HUG—MORE... But people run from me...and then I COM—BINE them...and they hate me...

Am I...capable of LOVE?
Or even...BEING loved?

You ARE loved, Prime
Robot! I love you.

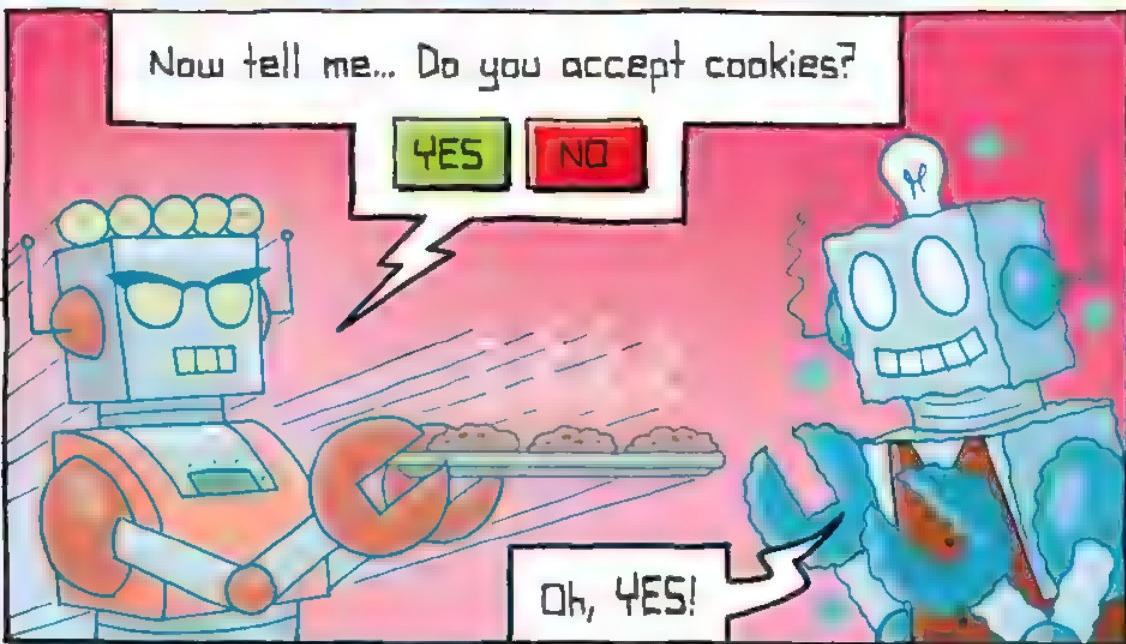

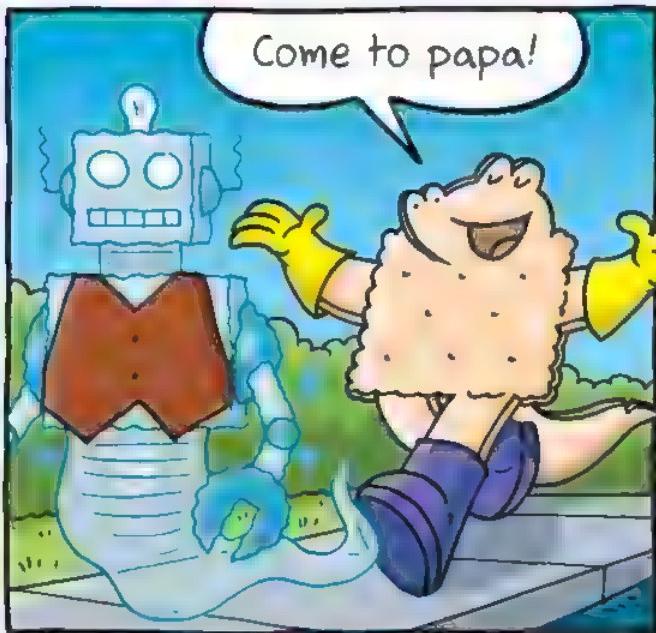

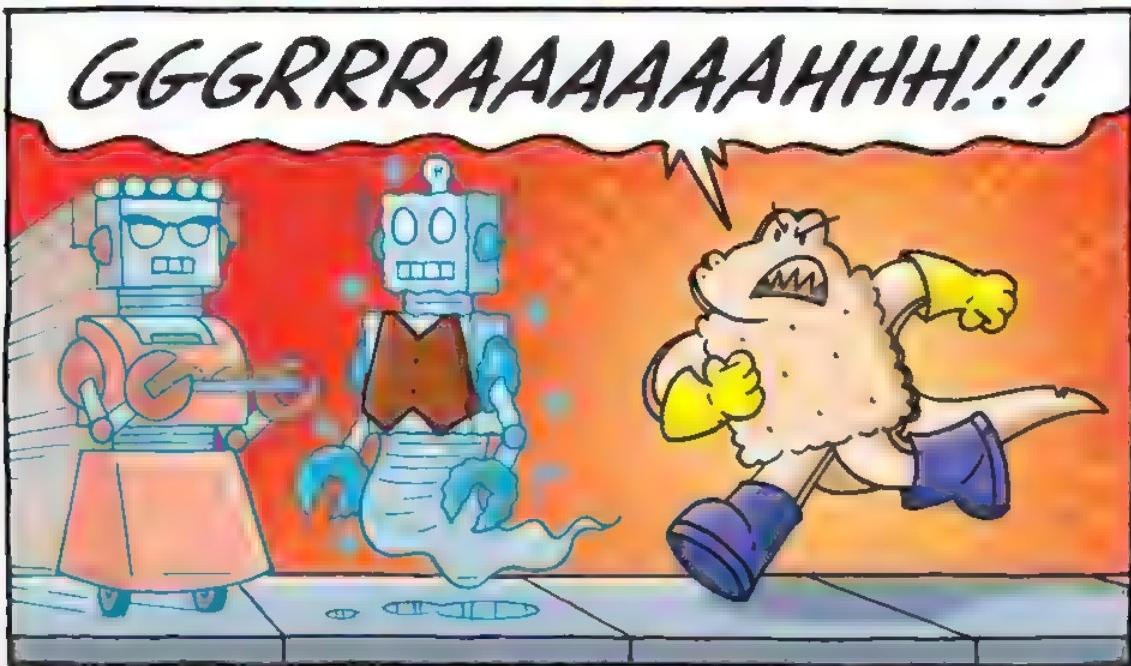

Now tell me... Do you accept cookies?

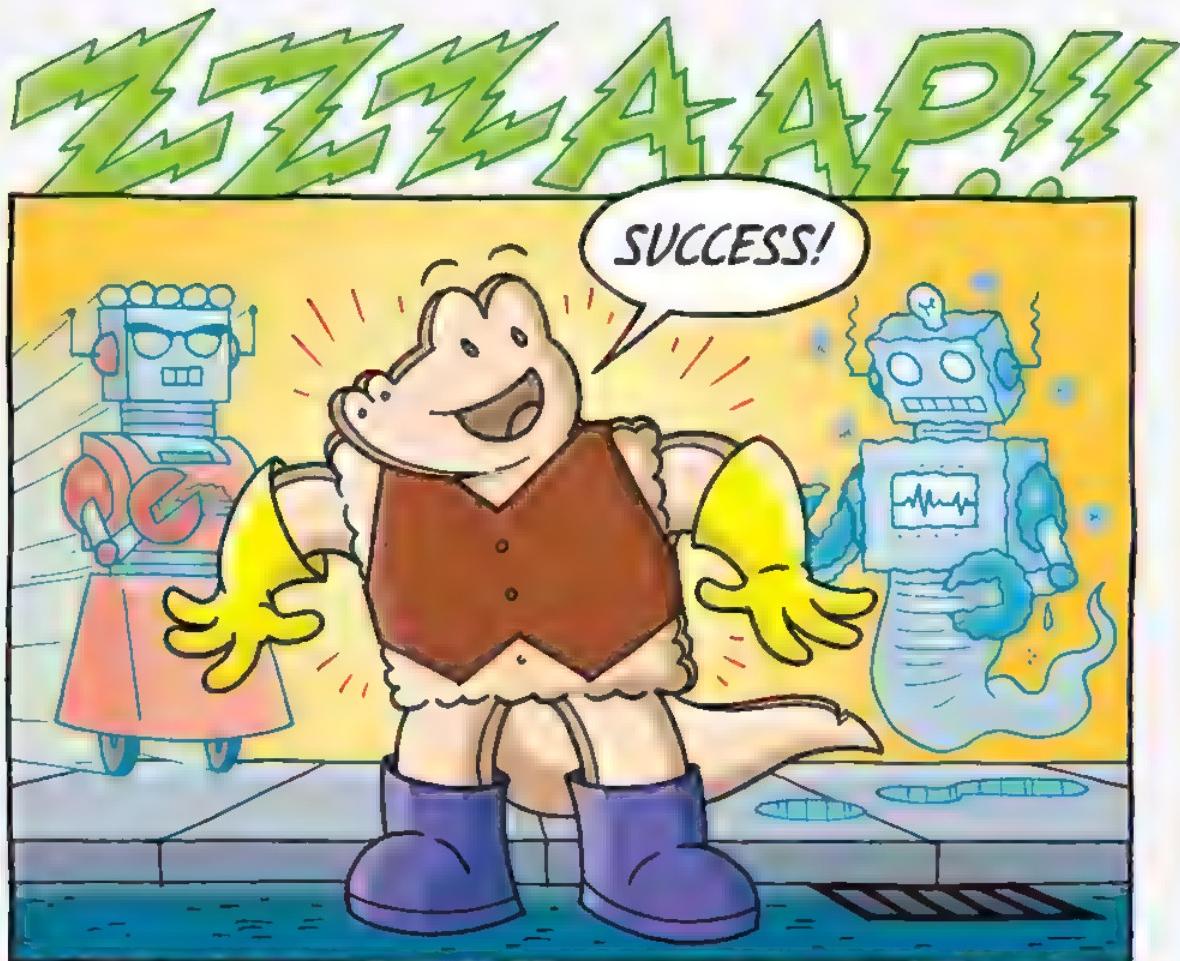

YES

NO

Oh, YES!

YES! YES!

This is even better than that stupid
SPY-BALL you sent after me!

My revenge against S.U.I.T.—and especially against
you, **BRASH**, for leaving me to die in that vat of
toxic saltine dough—is finally at **HAND!**

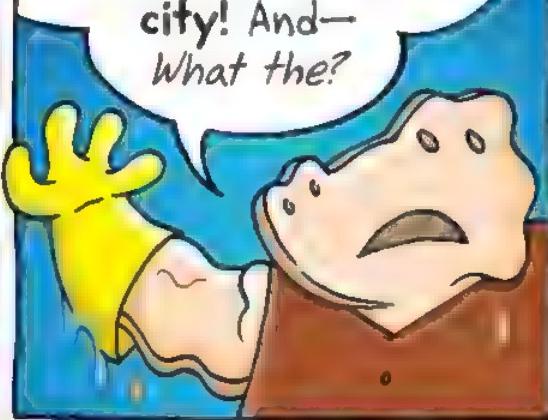

Brash, why'd you hold me back? Now **NOTHING** can stop Crackerdile!

Give it time, Mango.

You Gators are all washed up! Just like when I flooded the city! And—What the?

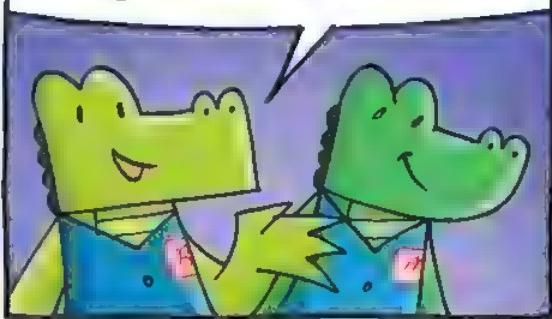

Why—why am I all **WET?**! I'm melting... **MELTING!**

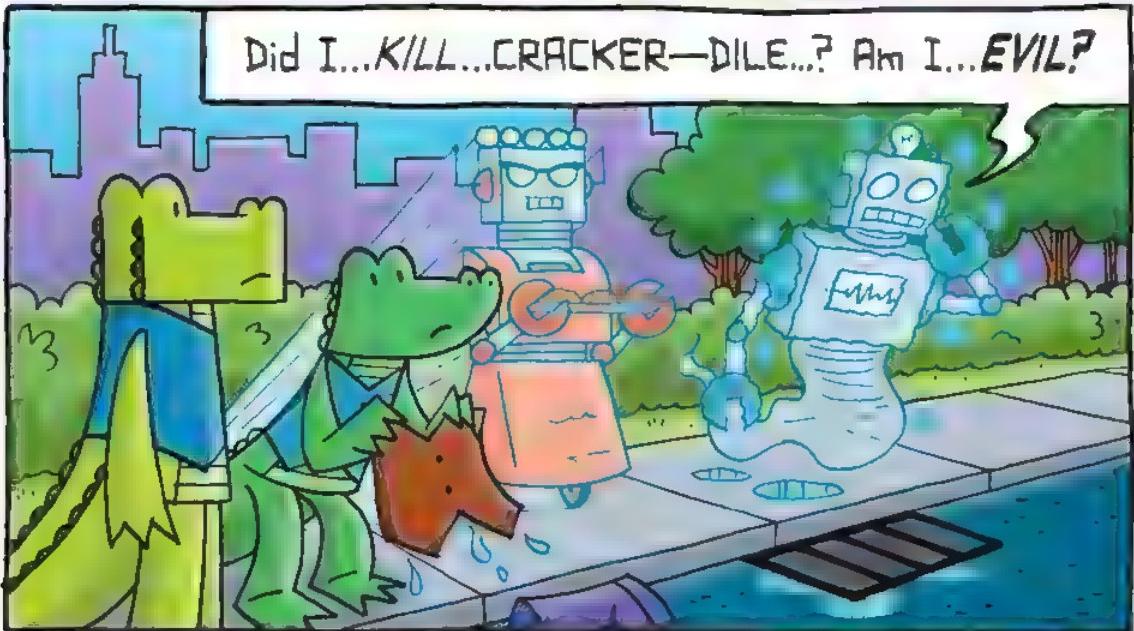

Oh! **HE'S** the one who's all washed up!

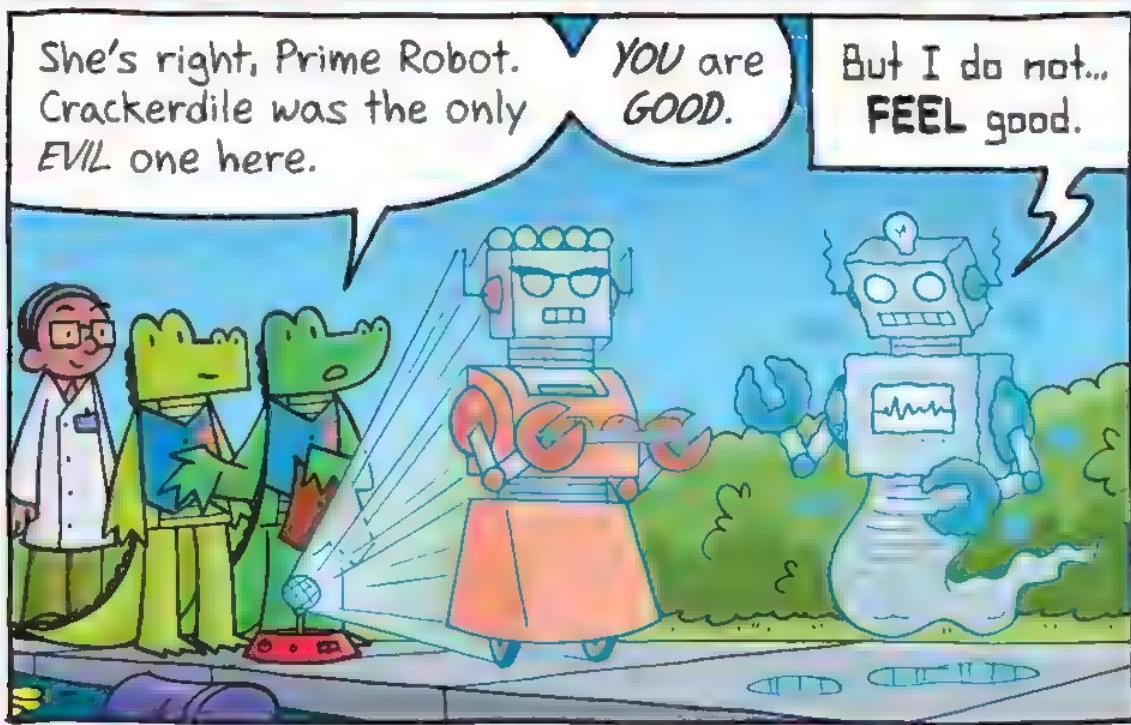

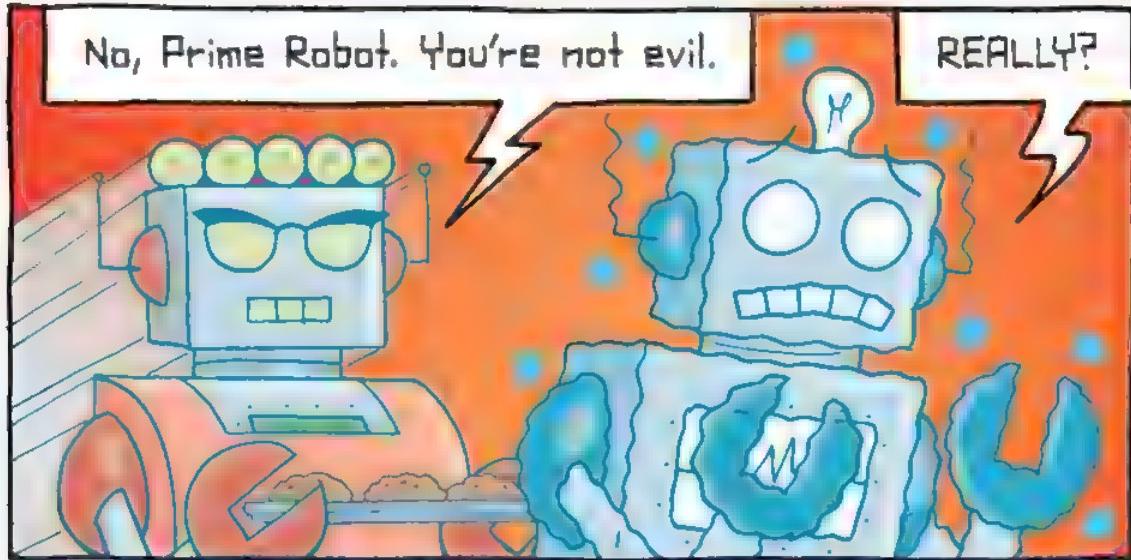

Crackerdile didn't realize Robot Ghost is made of water. The moisture just had to **SOAK IN** for him to get all **MUSHY** on us.

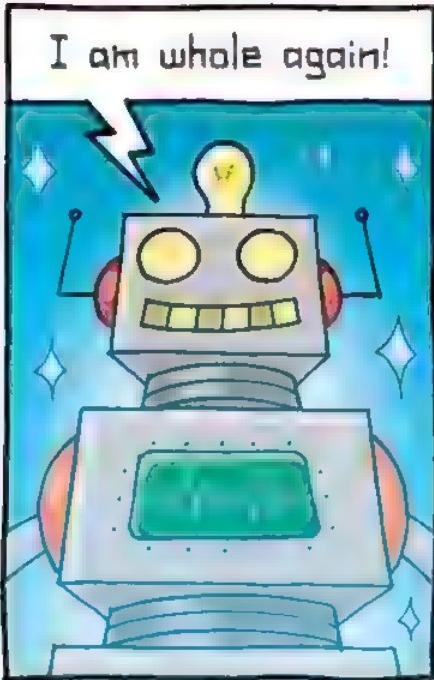

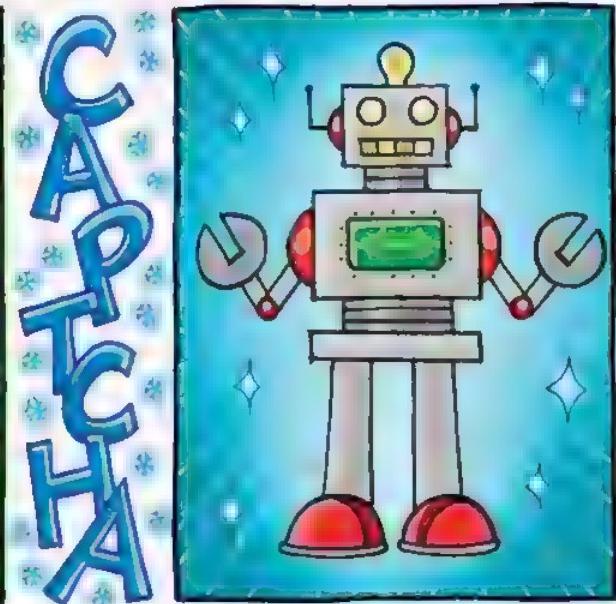

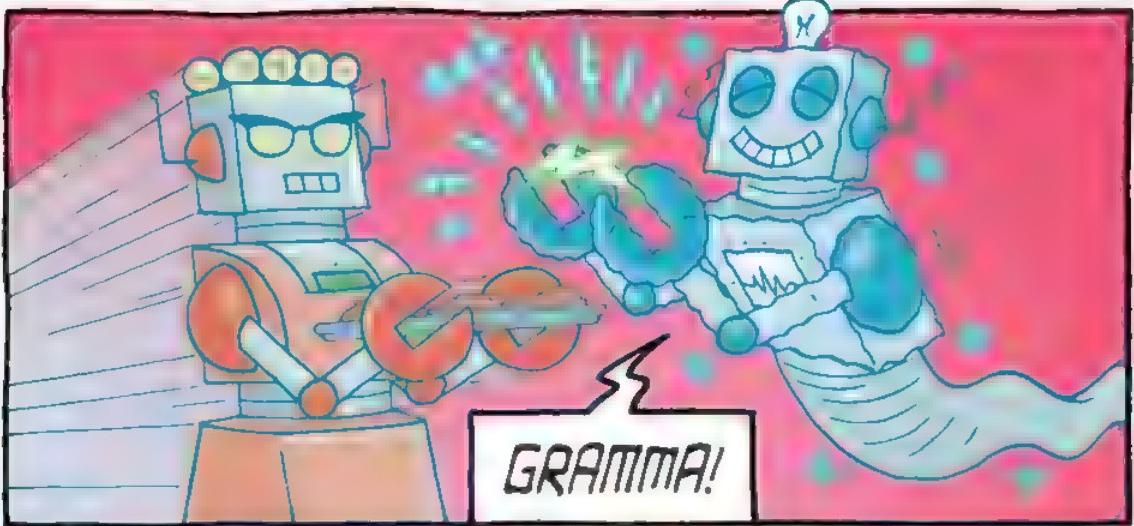

NO! This isn't over!

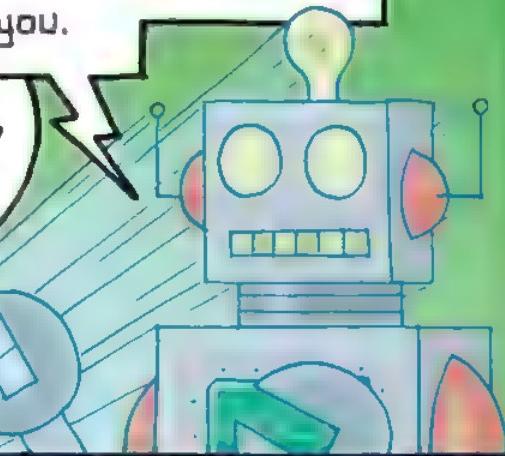

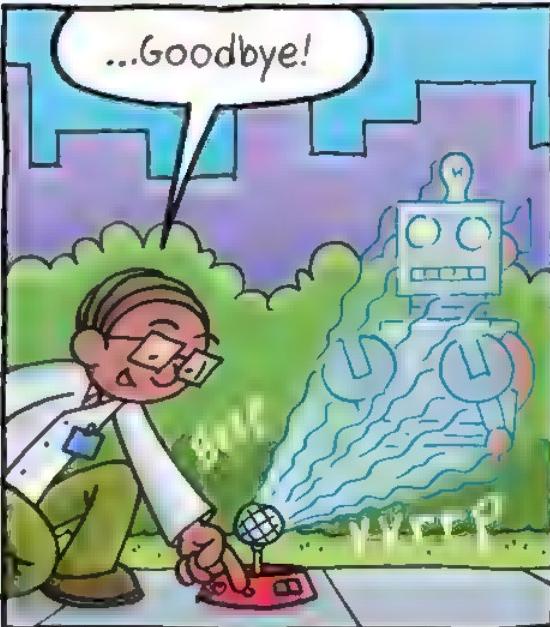

I...FEEL better now. I can sense my emotional programming and the COMBINOTRON code are no longer in conflict. Thank you.

You're welcome,
Prime Robot.
And now...

...Goodbye!

AAAHH!!

Did you just
DELETE him?!

No, of course not! I just turned him off. Prime Robot—or Prime ROBOGRAM, I should say—exists entirely intact within this hologram projector.

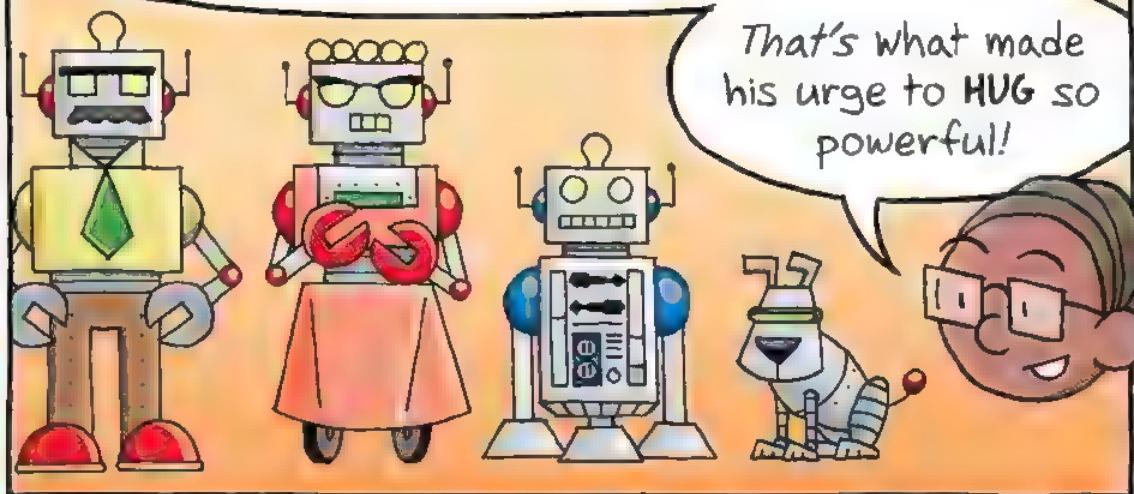

What happened to his grandmother? His hologramma?

She's a part of him now. But, in a way, she already was.

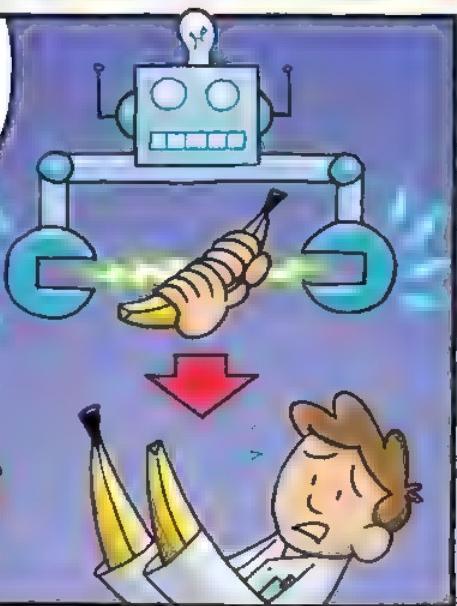

To create Prime Robot's true human emotions, I based his programming on family relationships... Parents, grandparents, siblings—even pets!

That's what made his urge to HUG so powerful!

As we eventually figured out, combinotron code got mixed in with his hugging subroutine, forcing him to COMBINE whatever he tried hugging!

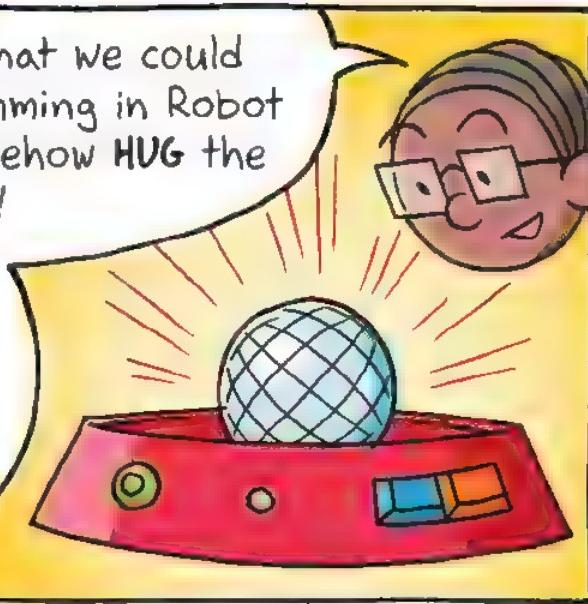

The only way to fix that mix-up was to write a new version of his main program. That part was easy. But since Prime Robot had gotten himself combined with water, turning him into what everyone thought was a Robot Ghost, the real challenge was how to get the new data into him.

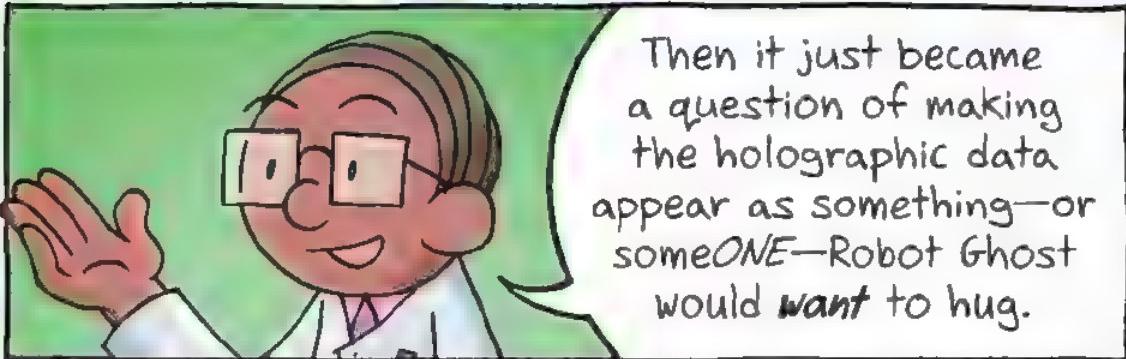

When Brash suggested that we could implant the new programming in Robot Ghost by having him somehow HUG the data, it gave me an idea!

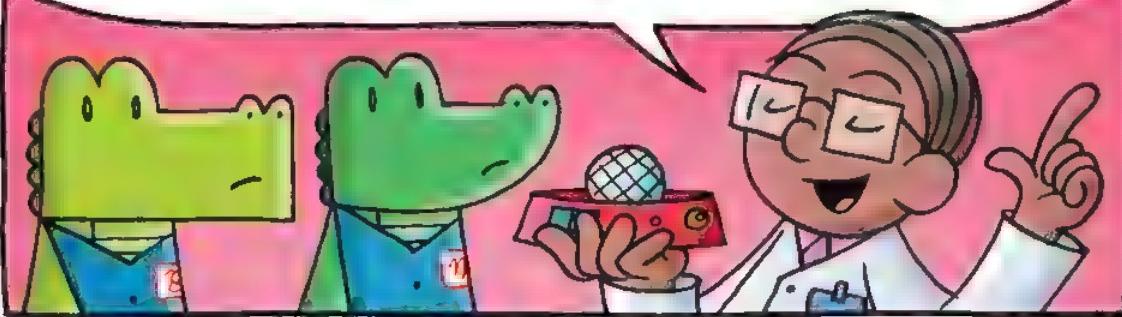

Apparently, during the montage we skipped, I invented this device, which could project the new programming as a hologram.

Then it just became a question of making the holographic data appear as something—or someONE—Robot Ghost would want to hug.

Thinking back to Prime Robot's original programming, the answer was clear: I could make the code look like his gramma! And who can resist a hug from their gramma? Especially when she has cookies!

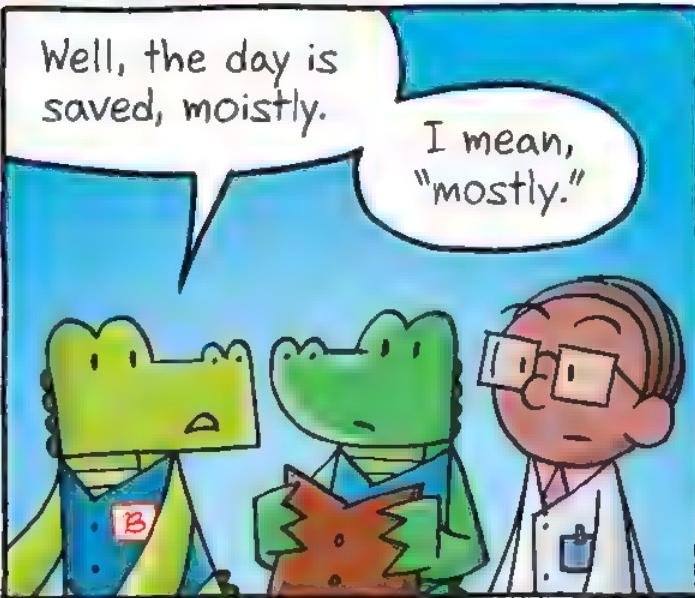

WOW! Who knew robotics had so much emotional manipulation!

Well, the day is saved, mostly.

I mean, "mostly."

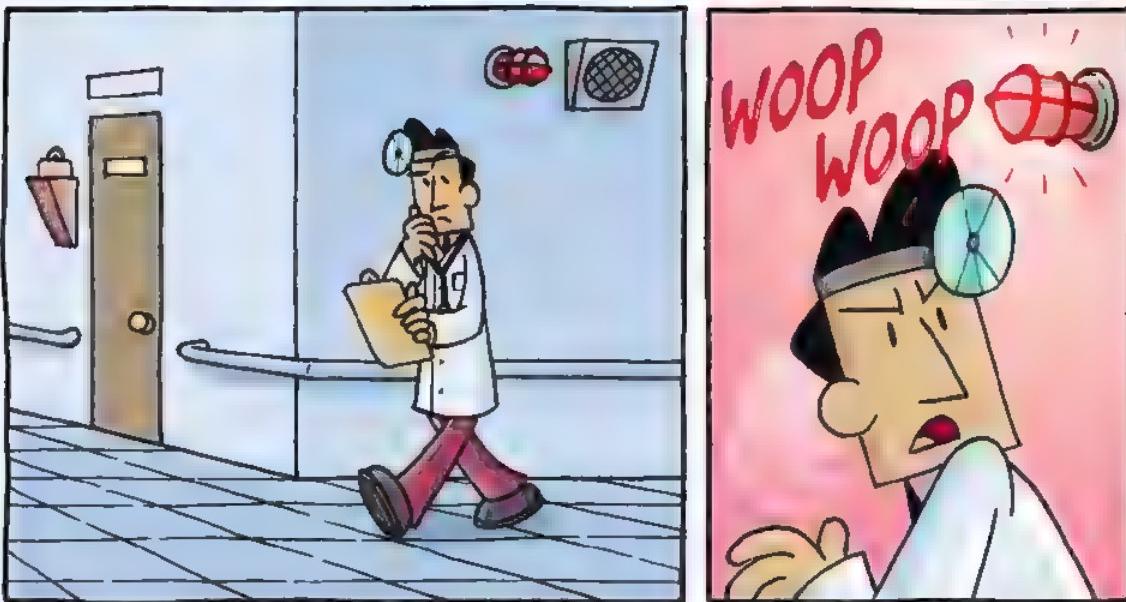

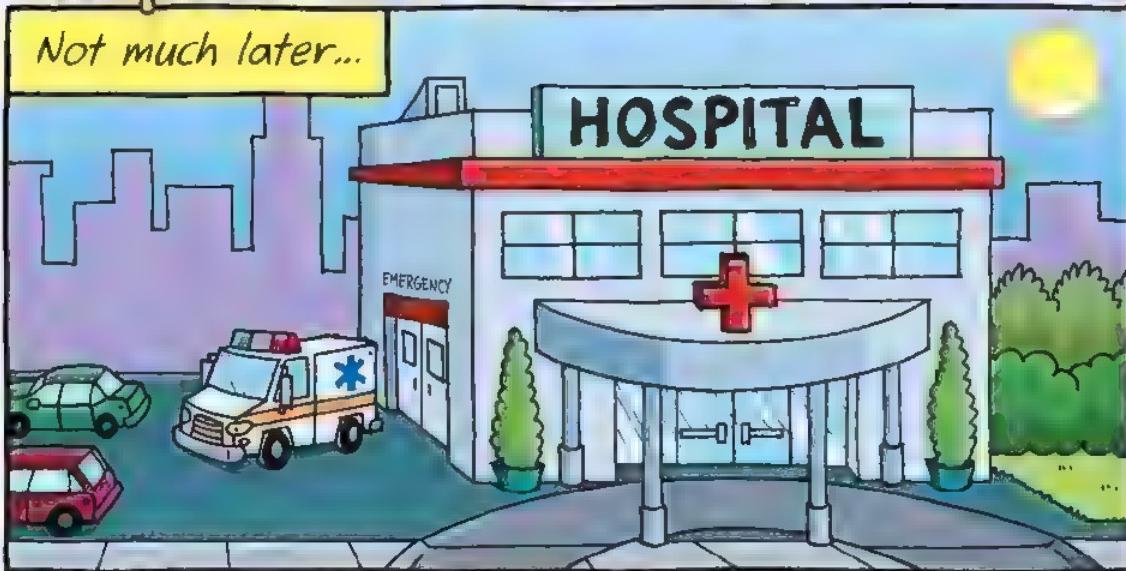

But there's still work to do! Let's get that V.E.S.T. back to S.U.I.T. and see if there's a way to cure Robot Ghost's victims. Come on!

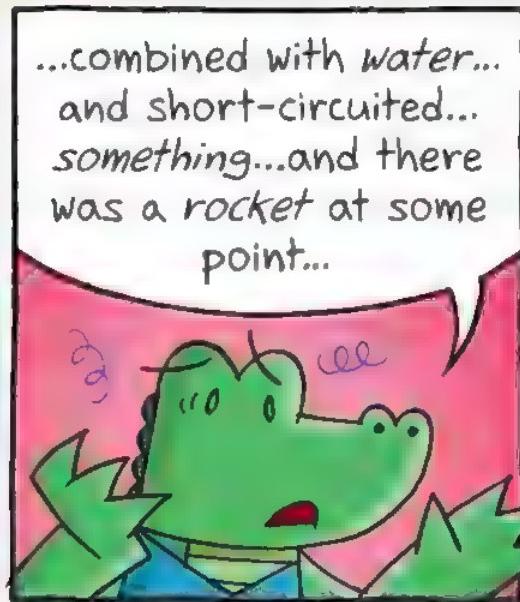

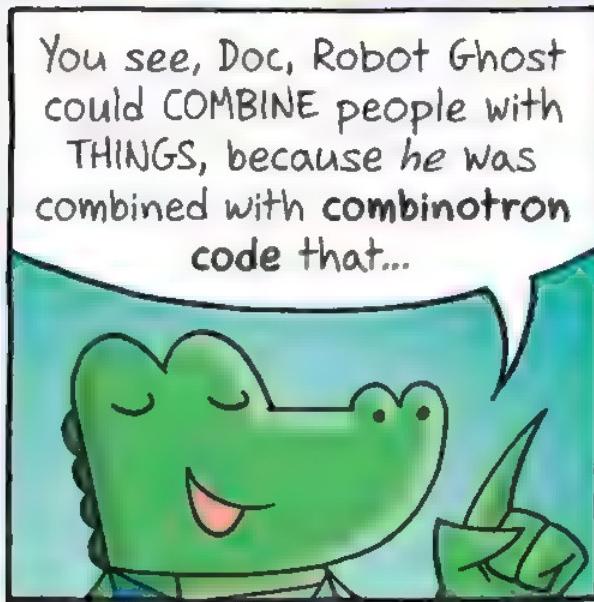

Chapter ONE MILLION (or thereabouts)

Not much later...

Trying to explain
this is giving me
a headache!

Do you need a
brain surgeon?

I can take care of this ache. I'm the **HEAD** Scientist!

I was able to reprogram the entity formerly known as Robot Ghost—who now exists as a hologram.

I reversed his
combinotron powers,
and turned them into
UNCOMBINOTRON
powers!

With the use of this holographic projector, the new and improved Prime Robogram was able to uncombine these patients from their low-protein dinners and restore them to normal!

So delicious!
So dry!

It uncombined us as well!
We're no longer badgers!

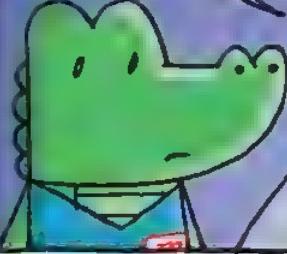

You mean "badges."

That's what I said.

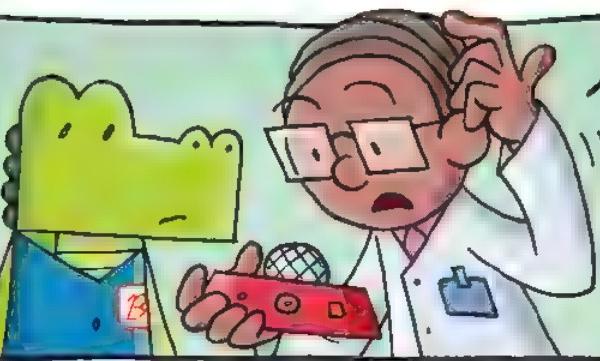

No, you said
"badgers."

Would that thing work on... **ANY** combination? Like,
say, a **brain surgeon** and a **news helicopter**?

That's a good
question.

So far, it's only been used to **uncombinotron** things
that were **combinotronned**. I'd recommend more
testing before using it to undo combinations
made by other means.

Why, you know someone?

Uh, just asking for a friend.

Well, it should work on...
THE SNAKE-ARMED
PLUMBER WHO'S STILL
MISSING!

You mean you haven't found him?!

HEY! We aren't even on active duty.
YOU TWO were supposed to solve this case!

Uh, we were turned into badges! And, um...you guys are the A-team... You know, A for...Awesome...?
Astonishing?

And we're the B-team,
for, uh—

B for Brash Blames the Badgers for Botching the job.

A for Apology Accepted.

Now, any ideas how to
find this snake-armed
plumber?

You'd think he'd have
turned up already. Like,
why hasn't he come to the
hospital on his own?

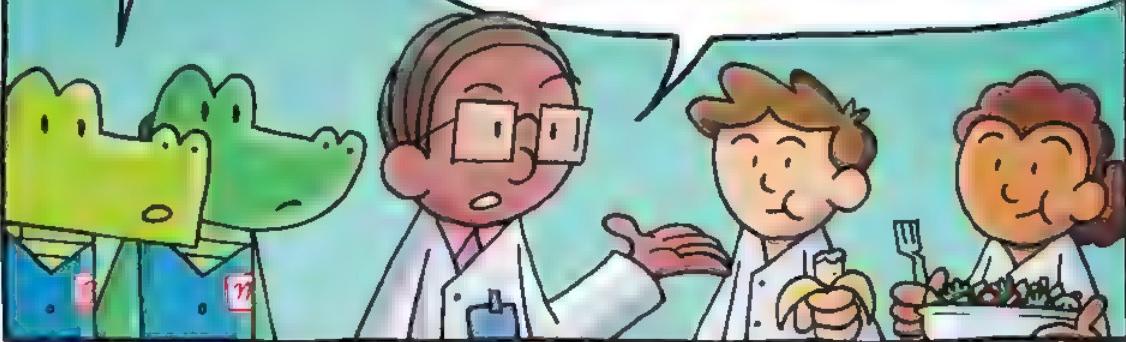

Wouldn't he want to see if a doctor could get the snake off his arm?

Is the snake on the PLUMBER? Or is the plumber on the SNAKE?

What's the difference?

Well, all the other combinations Robot Ghost created were with fruits and vegetables. Which, as far as science can tell, don't have minds of their own.

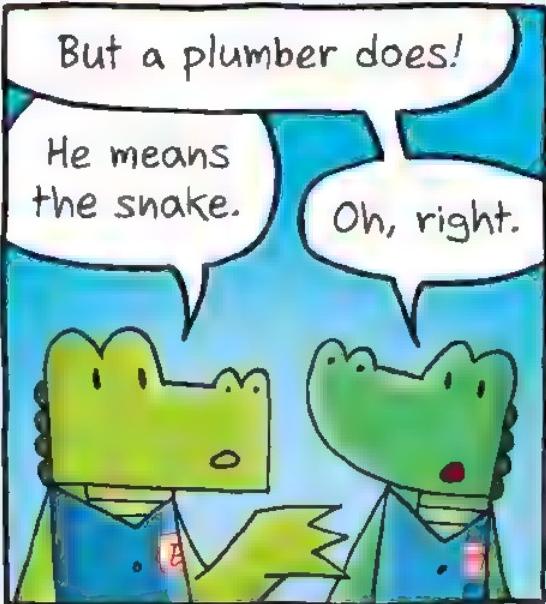

But a plumber does!

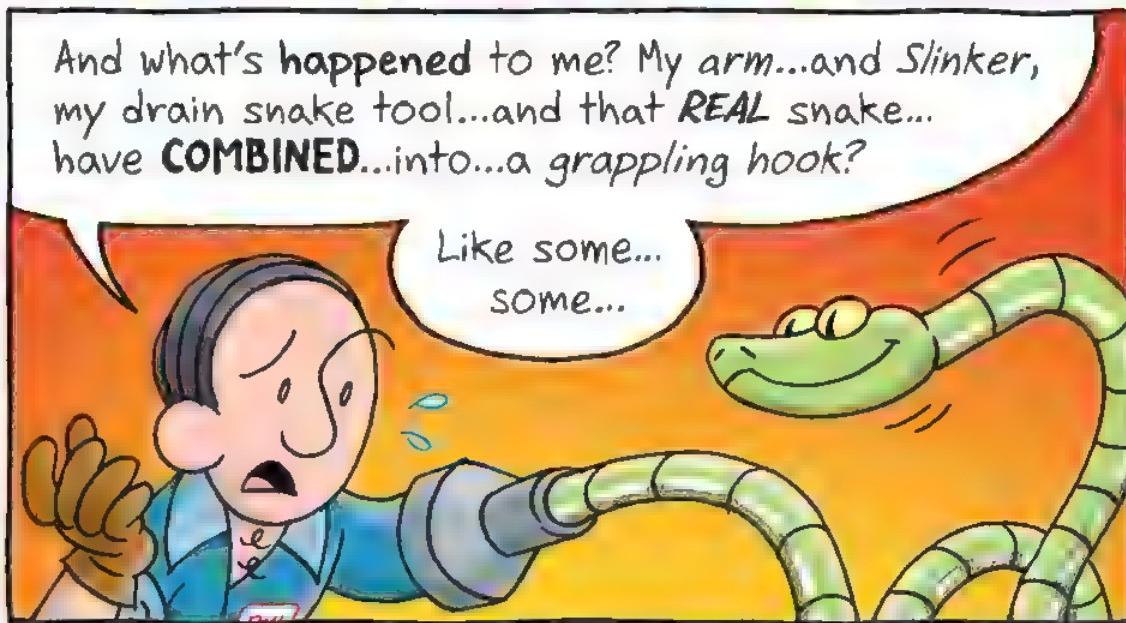

He means the snake.

Oh, right.

So the question is... which MIND is in control?
The PLUMBER'S?
Or the SNAKE'S?

Chapter S, for Speaking of the Snake...

Sssssssome ssssssort of... hook... line...

Yes...

YESSSSS...

Hookline... and
Ssssssslinker.

But... are we good...?

...or EEEEEEEEVLLLLL...

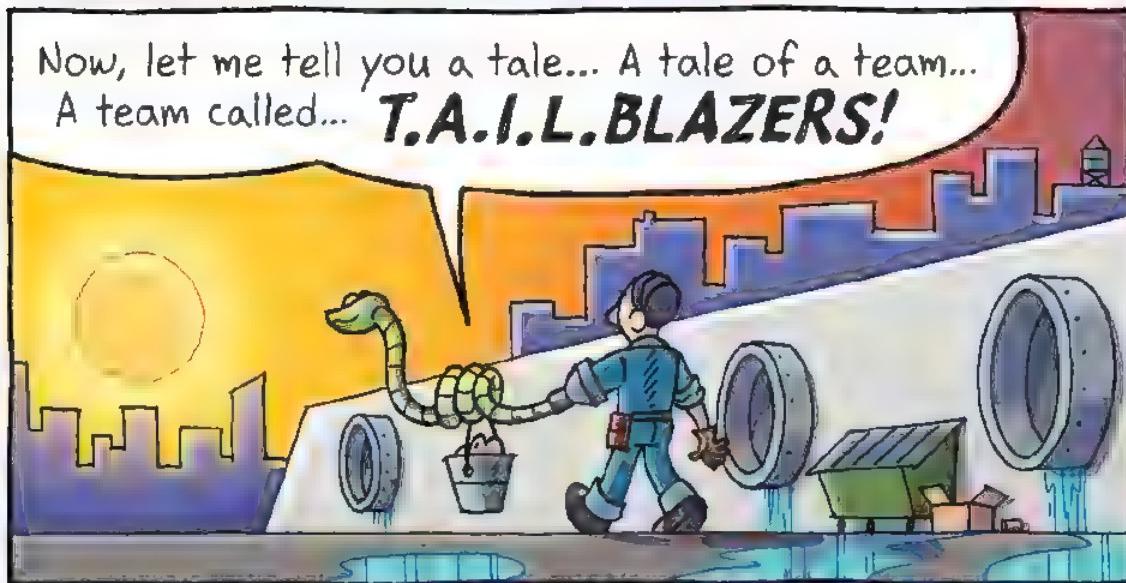

WHOA! That's a really cool **SNAKE ARM** ya got there!

Is it cool? Is it...a gift? Or a **CURSSSSSSSSSE...**?

Oh, a **GIFT**, clearly! In fact, that arm would come in **HANDY** as a member of the team I'm forming.

Of course,
I also need to
re**FORM** myself...

Epilogue

Leaving your posts... Interfering with the B-Team's investigation... HACKING into the S.U.I.T. business card network?!

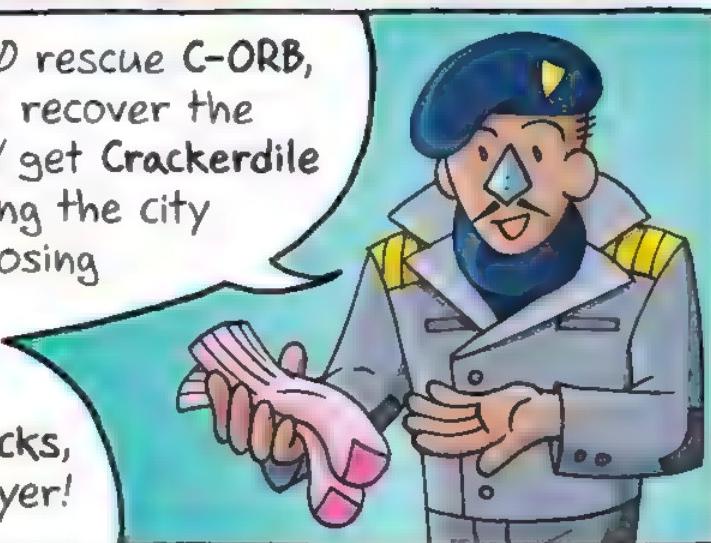

Mango and Brash, I have NO CHOICE but to suspend you from S.U.I.T. PERMANENTLY!

Then again, you DID rescue C-ORB, stop Robot Ghost, recover the stolen V.E.S.T., and get Crackerdile to admit to flooding the city while possibly disposing of him for good.

AND you brought me these warm socks, fresh from the dryer!

Welcome back to S.U.I.T., InvestiGators!

Now, go away,
so I can try on
these socks!

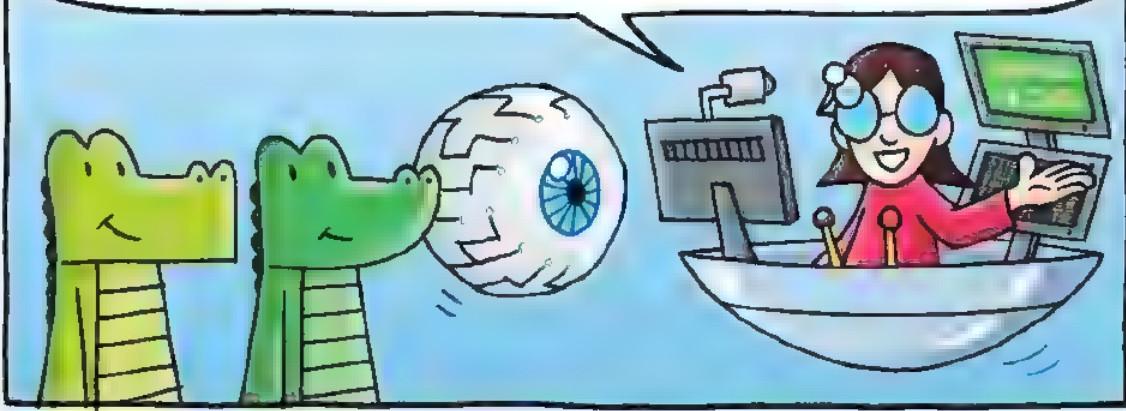

And get yourselves
new V.E.S.T.S!

Thanks,
General
Inspector!

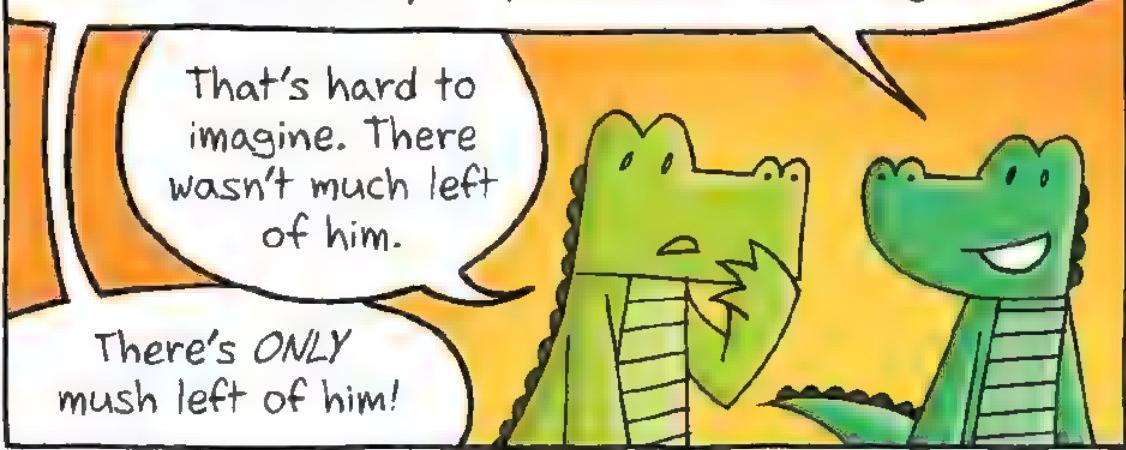

The secret sewer system entrances to S.U.I.T. have all been rearranged and rerouted. So S.O.U.P.'s off!

That should keep Crackerdile out for good, even if he does find a way to pull himself back together.

Still, I can't help but wonder if there's any part of my former partner, Daryl, left at all.

If we learned anything from this adventure, Brash, it's that people can change. They can change into foods AND back! Maybe there's still hope for Daryl.

Oh, hi, Bongo and Marsha. Any sign of the snake-armed plumber?

Not yet. But we wanted to let you know that the *B-TEAM* will always have your Back. Now, wanna get a Bite?

B! For Breakfast?

It's almost midday, so we were thinking **B** for Brunch.

Ooh, YES! **BRUNCH!**

And then tonight—
BRINNER!

Ugh, enough with the *B* words!

Whatever you say, **BRASH!**

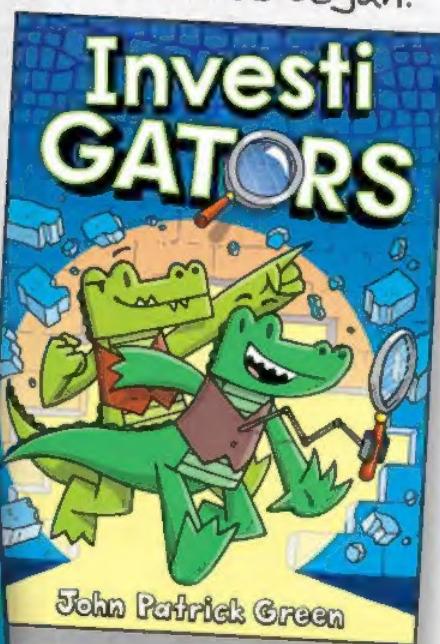

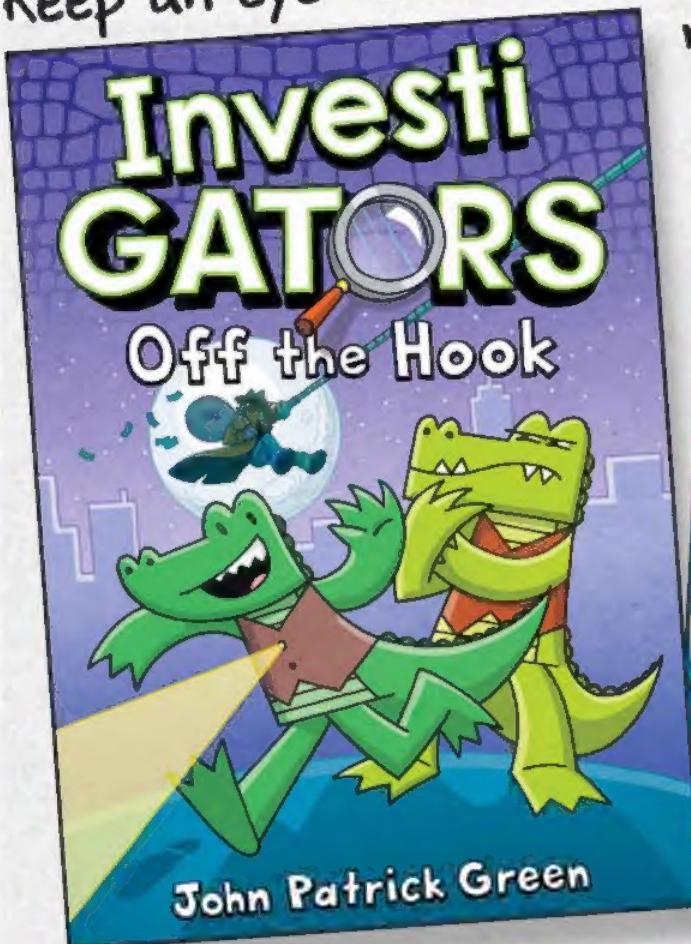

THE END!

The Secret Agent word of the day is: ACCOMPLICE

Robot Ghost stole a V.E.S.T. from S.U.I.T., but he isn't the only one responsible for the crime. Crackerdile was his accomplice.

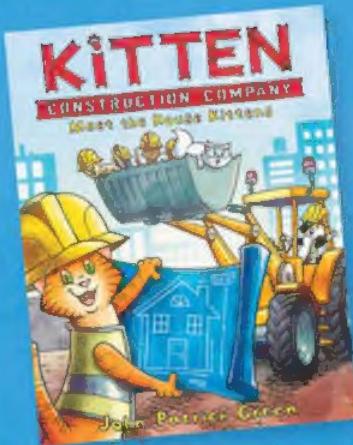

Keep an eye out for MANGO & BRASH's
next adventure!
